INTRODUCTION (BOOK ANTIQUA 12PT, BOLD, UPPERCASE)

(Book Antiqua, Size 12, Sentence case, Bold, No Indents) The main purpose of the introduction is to provide the necessary background or context of the research. The papers should originally research contributions and has never been published or is in the process of publication in other journals. The scope of the scientific articles published in this journal deals with a broad range of topics in the fields multidisciplinary study on Islamic Law from around the world, in particular issues related to Sharia Economics, History of Sharia Economic Thought, Islamic Law, Local Wisdom in Sharia Economic Perspective, and others related to Sharia Economics and current developments through the article publications. Journal of Sharia Economics and Integrative Law has specialization in Sharia Economics, Sharia Economics Law, Sharia Finance. This journal

cordially welcomes scholars' contributions of related disciplines. The papers must be submitted electronically via open journal systems and Register In website <http://jurnal.iainponorogo.ac.id/index.php/invest/index> or send to e-mail invest@iainponorogo.ac.id.

(Book Antiqua, Size 12, Sentence case, Bold, Indents) The body of paper must be elaborated between 3000 - 10.000 words (maximum) including abstract, references and footnotes, written in font: Book Antiqua Style, size: 12, line spacing: multiple (1.15). Moreover, the author(s) are required to use this template file (NOT creating new file) in order to avoid mismatch in the whole page layout (paper size, margins, etc).

The introduction should briefly place the study in a broad context and highlight why it is essential. It should define the purpose of the work and its significance. The current state of the research field should be reviewed carefully, and key publications cited. Provide broad definitions and discussions of the topic and incorporate views of others (literature review) into the discussion to support, refute, or demonstrate your position on the topic (state of the art). Please highlight controversial and diverging hypotheses when necessary. Finally, we briefly mention the main aim of the work and highlight the principal conclusions. As far as possible, please keep the introduction comprehensible to scientists outside your particular field of research.

This section also explains the rationale for the application of specific approaches, methods, procedures or techniques used to identify, select, and analyze information applied to understand the research problem/project, thereby, allowing the readers to critically evaluate your project's/study's overall validity and reliability.

DISCUSSION (BOOK ANTIQUA 12PT, BOLD, JUSTIFY, UPPERCASE)

(Book Antiqua, Size 12, Sentence case, Bold, No Indents) Authors should follow the format found in the INVEST template.

It is important to convince your reader of the potential impact of your impact of your study/research. The discussion is written to interpret and describe the significance of your findings in light of what was already known about the issues being investigated, and to explain any new understanding or insights about the problem after you have taken the findings into consideration. It should connect to the introduction by way of the research questions or hypotheses you posed and the literature you reviewed, but it does not simply repeat or rearrange the introduction; this section should always explain how your study has moved the reader's understanding of the research problem forward from where you left them at the end of the introduction.

The body could be divided into sections. Sections should be bold. Whichever spelling you choose (British or American English) please be consistent throughout.

Latin expressions, such as, e.g., i.e., et al., versus (vs.) should be set in italic. All terms or titles in Arabic should be transliterated with following the Library of Congress guide.

This section may be divided by subheadings. It should provide a concise and precise description of the experimental results, their interpretation as well as the experimental conclusions that can be drawn.

entry 2	Data	data

Authors should discuss the results and how they can be interpreted in perspective of previous studies and the working hypotheses. The findings and their implications should be discussed in the broadest context possible. Future research directions may also be highlighted.

CONCLUSION (**SUBHEAD 1: BOOK ANTIQUA, SIZE 12, UPPERCASE, BOLD**)

(Book Antiqua, Size 12, Sentence case, Bold, No Indents) Section title should be "Conclusion." Provide a discussion of the overall coverage of the article and concluding remarks.

(Book Antiqua, Size 12, Sentence case, Bold, Indents) The conclusion is intended to answer the research problems or purposes and also show the novelty. It helps the readers understand why your research should matter to them after they have finished reading the paper. It is not just a summary of the main topics covered or a re-statement of your research problem, but a synthesis of key points and, if applicable, where you recommend new areas for future research.

DISCLOSURE

Conflicts of Interest

This section is compulsory. A competing interest exists when professional judgment concerning the validity of research is influenced by a secondary interest, such as financial gain. We require that our authors reveal any possible conflict of interest in their submitted manuscripts. If there is no conflict of interest, authors should state that “The author(s) declare(s) that there is no conflict of interest regarding the publication of this paper.”

Some of the information you choose to provide here may constitute your “sensitive personal data”. Please read our [Privacy Policy](#) for further information on how we handle your personal data.

Declare conflicts of interest or state “The authors declare no conflict of interest.” Authors must identify and declare any personal circumstances or interest that may be perceived as inappropriately influencing the representation or interpretation of reported research results. Any role of the funders in the design of the study; in the collection, analyses or interpretation of data; in the writing of the manuscript, or in the decision to publish the results must be declared in this section. If there is no role, please state “The funders had no role in the design of the study; in the collection, analyses, or interpretation of data; in the writing of the manuscript, or in the decision to publish the results”. If you are a member of the editorial board or any other staff, indicate that herein.

Disclaimer Statement

If the work is part of a thesis submitted to a university for award of any degree, please indicate the degree, title of the thesis, amount of work extracted in the thesis, department and institution, name of the supervisors.

Declaration of generative AI in scientific writing

The below guidance only refers to the writing process, and not to the use of AI tools to analyse and draw insights from data as part of the research process.

Where authors use generative artificial intelligence (AI) and AI-assisted technologies in the writing process, authors should only use these technologies to improve readability and language. Applying the technology should be done with human oversight and control, and authors should carefully review and edit the result, as AI can generate authoritative-sounding output that can be incorrect, incomplete or biased. AI and AI-assisted technologies should not be listed as an author or co-author, or be cited as an

author. Authorship implies responsibilities and tasks that can only be attributed to and performed by humans, as outlined in Invest [AI policy for authors](#).

Authors should disclose in their manuscript the use of AI and AI-assisted technologies in the writing process by following the instructions below. A statement will appear in the published work. Please note that authors are ultimately responsible and accountable for the contents of the work.

Disclosure instructions

Authors must disclose the use of generative AI and AI-assisted technologies in the writing process by adding a statement at the end of their manuscript in the core manuscript file, before the References list. The statement should be placed in a new section entitled 'Declaration of Generative AI and AI-assisted technologies in the writing process'.

Statement: During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

This declaration does not apply to the use of basic tools for checking grammar, spelling, references etc. If there is nothing to disclose, there is no need to add a statement.

Funding Statement

Authors should state how the research and publication of their article was funded, by naming financially supporting bodies followed by any associated grant numbers in square brackets.

Funding: Please add: "This research received no external funding" or "This research was funded by NAME OF FUNDER, grant number XXX" and "The APC was funded by XXX". Check carefully that the details given are accurate and use the standard spelling of funding agency names at <https://search.crossref.org/funding>, any errors may affect your future funding.

Acknowledgments

An Acknowledgements section is optional and may recognise those individuals who provided help during the research and preparation of the manuscript.

In this section you can acknowledge any support given which is not covered by the author contribution or funding sections. This may include administrative and technical support, or donations in kind (e.g., materials used for experiments). Do not acknowledge family members in this section if they have no relevance in the study.

Authorship and Level of Contribution

In the event that the paper is co-authored, please indicate the level of contribution of each author. Follow the COPE's guideline on authorship.

Supplementary Materials

If Supplementary Materials are provided (e.g., audio files, video clips or datasets) they should be described here. Note that authors are responsible for providing the final Supplementary Materials files that will be published along with the article, which are not modified by our production team. You should remember to reference the Supplementary Materials' contents at appropriate points within the manuscript. We recommend citing specific items, rather than referring to the Supplementary Materials in general, for example: "See Figures S1-S10 in the Supplementary Material for comprehensive image analysis."

Author Bionote

Provide a 100 word about yourself. Focus on the current affiliation, research interests and experience and current level of education. Do the same in case of more than one author. Write the bionote from third person's voice.

BIBLIOGRAPHY (**BOOK ANTIQUA 12PT, BOLD, UPPERCASE**)

INVEST uses *CMS (Chicago Manual Style) 17th referencing style*. The references should be in alphabetical order, Use Book Antiqua (12), 1 spaced. The minimum requirement is 20 references. It should include references obtained from primary sources (consisting of amounting to **80%** of the entire bibliography includes journals, thesis, disertations, and others research) that have been published in the **last 10 (ten) years**. The remaining **20%** may include secondary sources (books and other relevant publications). It is suggested to apply *Mendeley* reference software.
