

# THE PAULO PAGES

*"Pride of the Panther, Pride of the People, Pride of the Paper"*

Issue No. 24

**Publishers:** Christina Buttarro, Karter Cheng, Quinn Gao, David Kaht, Nicole Kolyuzhko, Vassilissa Langman, Amanda Monaghan, Vincent Mancini, Sonny Palombo, Joseph Tenaglia

**Editors:** Mr. Ferraro and Ms. Henrich

**April 2023**

## NEW HORROR MOVIES

BY: MADISON CIRELLI

This movie is about a family of three vacationing at a remote cabin who are suddenly held hostage by four strangers, who demand they sacrifice one of their own to avert the apocalypse.

**Rating:R**

This movie is about Sam and Tara Carpenter attempt to leave Ghostface behind by moving to

## SPACE NEWS

BY: OLIVIA FRAZIER

If you're here, you're most likely interested in space news! Here we will talk about the top 10 interesting facts about space and natural phenomena that occur in the sky!

### 10)Something strange is eating the galaxy

Yup! Something strange is eating away at the galaxy. Here's something a little unnerving: some unidentified thing that's larger than anything we've ever discovered is slowly eating the Milky Way galaxy. Scientists call it the "dark flow" phenomenon. But you know, it's probably fine. For now. Dark flow represents the movement of hundreds of galaxy clusters at about two million miles per hour in the direction of a patch of sky between the constellations Centaurus and Vela. This is fascinating. Its truly wondrous to see whats beyond our borders even if it may be potentially life threatening. As scientists work to uncover more about this space phenomenon we will continue to wonder about its purpose.

### 9) Circumhorizontal Arc

New York City, along with twins Chad and Mindy Meeks-Martin. Unsurprisingly, it doesn't go to plan when they're targeted by a Ghostface super fan, before watching all Scream movies!

**Rating: R**

## **Review Is What I Say**

**We review games here... that's really it.**

**BY: DAVID KAHT**

Hello! It's me, David, from Review is What I Say. If you don't already know, this section is named after my YouTube channel, which ironically doesn't have any reviews on it. [Click here](#). If this is the issue I think it is, this is the St. Patrick's day issue. Jolly day for the Irish. If I botched the timing, ummmmm... happy March? Today, we cover a popular indie game that has a very old-timey art style:

## **Cuphead**

Yes, I have pretty much killed the old theme of "popular games that aren't popular anymore," but I ran out of ideas. Anyways, Cuphead is a hand-drawn run-and-gun game where you are an old fashioned cartoon cup, red or blue, beating up bosses. Although there is a DLC for Cuphead, we will stick with the original game, "Don't Deal With the Devil," for simplicity. First of all, the controls start out simple, with a simple run, jump, and shoot control. Then you learn about cards, and lives, and other types of jumps. Does it get complicated. Purposefully so! The plot of the game is that Cuphead and Mugman are gambling men, always hitting up the casino and rolling the dice. One day, they win so many times that the Devil himself comes in a beat them at a game. Predictably, they lost, and the Devil makes a deal with the 2: their souls are toast unless they take some contracts and gank a bunch of different characters across Inkwell Isles. They accept. The game's flow is simple. There are the occasional level with a bunch of enemies

If someone asks you the question what looks like an inverted rainbow but isn't, the answer is a Circumhorizontal Arc. But what exactly is this natural phenomenon? These Ice halos, created by the refraction of sunlight or moon on the surface of ice sheets suspended in the atmosphere, look like a large iridescent band!

## 8) There's a lot of water in space

Yes you heard me. Water in space! About 12 billion light years away is a giant cloud of water vapor. It is 100,000 times larger than the sun (Yes that big) and contains 140 trillion more water than all the oceans on our planet! Space water would be out of this world!

## 17) Lenticular Clouds

that you need to go through to win. However, the REAL game comes in the form of the boss battles. Each boss has an unknown amount of hits in order to be taken out, and you need to constantly shoot at them to widdle their health down while they attack you in complicated ways. Oh and by the way, you only have 3 hit points, so you have to be darn careful not even a banana peel is in your pathways. Each boss has 3 phases: the starting phase, the harder version of the starting phase, and the transformation, where the boss upgrades, and gets a brand new move set to kill you with. The game has 2 main selling points. The first is the difficulty. Good god the difficulty! Good luck trying to beat even the easiest of bosses in the game without at least dying once. Nobody I know has done so. This is meant to be reminiscent of the old “impossible” games of the 80’s and 90’s, like Contra, TMNT, and Battletoads. The other, more significant selling point is the art style. It doesn’t take a genius to know that the art style of Cuphead is an homage to cartoon shorts of the mid 1930’s, specifically those done by the Fleischer Bros for Betty Boop or Popeye, although other cartoons of the period like Mickey Mouse and Looney Tunes were inspirations too. The madlads behind this game were so dead-set on making the game in this art style that they decided to hand-draw every single last frame of animation, while only coloring digitally. This would of course give the game the cel-animation look for cartoons that had been standard all the way up until the turn of the millennium. This was such a grueling process for the devs that the release of the game was pushed back several, several, times just to finish. And to think that they did the whole process again for the DLC! Everybody obviously loved the art style, and rather predictably, the game exploded, becoming one of the biggest indie successes of 2017 on the same level of Hollow Knight, and being an online star. Of course, things only get crazier considering the whole-butts DLC and Netflix show that was made for the game. I recommend this game to everybody, because it is just... IT’S JUST NEAT!

Next time you visit the mountains (which is highly unlikely) look at the crest (whats a crest?) and try to spot these lenticular clouds! These saucer shaped clouds bring a huge gust of wind along with them (I am definitely not visiting the mountains during the winter, yikes!) You might confuse them with peoples most plausible theory... Ufos! These clouds are formed when moist air are formed over mountain ranges. They are formed when fast winds are moving most commonly seen during winters and springs. You may sometimes witness these clouds on plain lands and just like that its your lucky day!

## 6)Time travel might be possible but...

Time Travel! Yes time travel is possible but you would have to have a lot of money and it would be a huge pain to try and do this. You’d have to build an enormous particle accelerator in space (YIKES!, How do you even build one of those things.) that would stabilize space-time foam, then you would have to enlarge a worm hole and connect it to a gravitational field (woof) How long would than even take! Who even has time for that. Someone with a time machine maybe (ba boom)

## 5)Catatumbo Lightening

This one sounds frightening and looks even worse. Its like lighting rain in my opinion! A few flashes of lighting are fine to see on an occasional rainy day but imagine witnessing

# TEACHERS AND THEIR FAVORITE PLACES TO VISIT

BY: NICOLE KOLYUZHKO AND VASSILISSA LANGMAN

We've got the best places to visit, teacher's edition. Now you might be wondering, do they like museums or something? Well, the answer is no, many of these places are super awesome and full of life (no offense museum's, but you have some boring stuff sometimes)

~Mr. Ferraro

I asked "What are your top three best places you would recommend to visit?" He answered, "Hudson Valley, Long Beach Island (LBI), Manhattan." I continued, "Was there anything special about these places?" Mr. Ferraro said, "Hudson Valley is special because it is beautiful and peaceful. I also have memories of there. LBI is just because it's pretty and relaxing. It's a beach. Manhattan is because I've always liked it and it's fun."

~Ms.Henrich

Ms. Henrich is my favorite teacher so I wonder what her favorite place is. When I came up to Ms.Henrich, I asked her, "Ms.Henrich, what is your favorite place to visit in the world?" Ms.Henrich thought for a second. " Hmm, Me? I like to go to Myrtle Beach in South Carolina." This seems like a wonderful beach. In South Carolina, it's warm, not as cold as it is here, in New York. I asked, "Do you go there alone, or with someone?" "No, I go there with my sisters, mom, and some friends." Well that must be fun! "My favorite place would be myrtle beach because it has clear water, and the food there is really good."

~Mrs.Imparato

lighting for a constant of ten hours! Now that's horrifying! A little bizarre and definitely a sight to see, Catatambo lightning occurs over the mouth of the Catatambo River where it merges into Lake Maracaibo in Venezuela. So definitely not even near where we live but imagine? The lightning occurs 120 to 140 nights per year and you should plan on visiting accordingly. The visiting season is between May and November, October driving the highest number of tourists.

## 4) NASA has recorded eerie space "sounds."

"Theirs no sound in space" people say but with science when new information is presented we change our thinking. "NASA uses a technique called data sonification to take signals from radio waves, plasma waves, and magnetic fields and convert them into audio tracks to "hear" what's happening in space." thats trippy. Plasma waves and magnetic fields having sounds seems like something we would see in the movies but this makes space just ten times scarier. The sounds range from ambulance-like screeches to beeps reminiscent of an alien spaceship making its approach. Thats extremely nerve racking. I wonder what these sounds do for space. How they affect space. There has to be a reason for these sounds right...

## 3)Light Pillars

An optical illusion (yes a real life optical illusions), a light pillar is formed when a beam of light appears to be extended above or below a light source. "The effect is seen when light is reflected from the crystals of ice in the atmosphere. The reflection from the sun is called Solar Pillar." During medieval times these lights were often considered to be a bad omen. These light pillars are able to be seen at any given point during the day (Yes even at night!) Seeing this natural phenomenon feels like you are in between the colorful waterfalls, experiencing a mesmerizing few of sky.

## 2)There's a fascinating reason why space appears black.

You might think their is no black space because all the stars burn bright with their

Me and Vas entered Ms. Imparato's classroom. "Ms. Imparato, what are your favorite places to visit?" "Hmm, like anywhere in the world?" "Yeah." "Well give me a minute. I like to go to Italy, Costa Rica, and California." These seem pretty nice. "I like Italy because of Amalfi, Coast Rica because of the beaches and California because of their architecture."

~Mr. Scarpa  
I asked Mr. Scarpa, "What are three places you would recommend to visit?" He sighed and said, "Salem Massachusetts, Niagara Falls, Austin Texas." I continued, "What made these places so unique?" He answered, "Salem I love for the history, Niagara falls is beautiful, Austin Texas because it has great live music."

After doing an interview on many students, we have collected the information that Italy was the most popular kids choice.

Myrtle Beach, South Carolina  
Costa Rica |  
Italy Htt  
LBI  
Manhattan Il  
Hudson Valley Il  
Salem Massachusetts |  
Niagra Falls |  
Austin Texas

*Lets know some facts about a speech teacher that I have Mondays and Wednesdays*

*- it is Mrs Falcon*

*By: Amanda Monaghan*

**1 How many years have you been working at IS75?**

I've been working at IS 75 for 6 years.

iridescence but this is not the case. "This phenomenon is known as Olbers' Paradox, named for the German astronomer Heinrich Wilhelm Olbers who posed it in 1823: if the universe is infinite, static, and timeless, then everywhere you look should eventually hit a star." Turns out the universe is neither static nor timeless (surprise surprise.) "Edwin Hubble discovered that the universe is expanding, and thermal radiation left over from the Big Bang puts the universe at 13.8 billion years old. We don't see stars in every direction because some stars haven't been around long enough for their light to reach us." Thats crazy to think about how time in space is so much different than their. How new things are happening every day in space and new things are being discovered and we just get to know about it. Space is wild!

## 1) Green Flash

At the number one spot we have the green flash. Your extremely rare if you ever seen this one because this phenomenon only lasts for a couple of seconds. This phenomenon is when part of the sun transforms green. If you want to catch this, its mostly seen during sunrise and sunsets. "It is caused by the refraction of sunlight when light travels through Earth's atmosphere more and it is during sunset or sunrise. It is said that other colors than green are also seen as per the light rays refract and their wavelength, but mostly green color is seen and captured. There are four categories of green flash: a mock mirage, inferior mirage, green-ray and subduct flash. However, the green flash is rarely seen where you'll see a beam of green light shoot immediately after the sun sets for about a second." This is extremely crazy! This green flash is portrayed in different forms and is extremely rare. This is the one phenomenon (along with red sprites) I really would wish to see!

## SHOWS COMING OUT IN 2023

BY: CHRISTINA TIMOSHKOV

This year, we already have some new shows coming out! However, not many people are aware of this. I'm going to include all the new shows that are debuting this year from the months January - May in this article.

### January 2023

- Kaleidoscope, Season 1
- Lady Voyeur, Season 1
- The Way of the Household, Season 2
- Survivor, New Seasons
- Ginny & Georgia, Season 2
- The Walking Dead, Season 11

## 2 Why did you decide to be a speech teacher?

I always loved helping people, especially children. It is rewarding because I get to help my students, and hopefully make a positive impact in their lives.

## 3 Why do you like to read stories from magazines?

I love learning new things and sharing them with my students.

## 4 What was your least favorite subject when you were in school?

My least favorite subject was definitely Math!

## 5 Who inspired you to be a speech teacher?

A good friend of mine was studying Speech Pathology in college and told me to take a few classes. The first class I took was Phonology (the study of sound patterns) and I was immediately hooked!

## 6 What do you do with your kids after school?

I drive them to all of their after-school activities, specifically basketball practices and training.

## 7 What is your favorite place to go on vacation?

Aruba is one of my all-time favorite places- perfect weather, beautiful scenery, and pink sand beaches!

## 8 How old are your kids?

Marley is 16, Gabby is 13, and Dean is 12.

## 9 What is your favorite story that we read from the magazines?

I love reading debate articles with my students so we can truly understand each other's perspectives.

## 10 What was something interesting that you learned from the tri state tornado?

### February 2023

- Andor, Season 1
- She-Hulk: Attorney at Law, Season 1
- The Lord of the Rings: The Rings of Power, Season 1
- Atlanta, Season 1

### March 2023

- Next in Fashion, Season 2
- You, Season 4 Part 2
- The Glory, Part 2
- Shadow and Bone, Season 2
- The Night Agent
- Unstable

### April 2023

- Mysteries Decoded, Season 2
- Dave, Season 3
- From, Season 2

### May 2023

- Harriet the Spy, Season 2
- Yellowstone, Season 5
- City on Fire, Season 1
- Fear the Walking Dead, Season 8
- Nancy Drew, Season 4

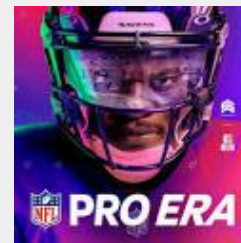

Although some of these shows have already been released, I cannot wait for the others! For the remaining months, I was unable to find all of the new series that are debuting this year because there are so many.

## NFL PRO ERA REVIEW

BY: CHRISTOPHER PAPANDREA

If you don't know, NFL pro era is a game on Oculus (VR) that gives you the opportunity to play the Quarterback (QB) for your favorite NFL team. It is the first fully licensed NFL VR game, and it is \$30.00. Although it is really expensive, you can play with your friends (multiplayer) Play the 2 minute drill, Exhibition mode, and EVEN PLAY PLAYOFFS and LEAD YOUR TEAM to the SUPERBOWL! To me, It is worth the money, so I would rate it a...

5/5

## BOOKS & MORE BOOKS

BY: VINCENT MANCINI

Principal's Book Club #3

Mr. Zapata is hosting the Principal's Book Club #3. In these book clubs, you read the book that is given to you, then, on a certain day, you discuss

The tri-state tornado story was interesting because it taught us the importance of family. Life is unpredictable, and tomorrow is not guaranteed, so it is important to be grateful for what we have and not take anything for granted.

**11 What was something that you learned from the taco story?**

The taco article was interesting because we learned that tacos were brought to the U.S. by immigrants who came here in search of work and opportunities.

**12 What was something that you learned from the spaghetti story?**

In the history of Spaghetti and meatballs article, we learned that meals in Italy were different than meals in the U.S. Italians did not eat much meat because it was expensive, and once they immigrated to the U.S., meat was cheaper and more plentiful, and social workers encouraged Italian immigrants to eat more of it.

**13 What is your favorite food?**

I love all variations of pizza, I've never had a bad slice of pizza!

**14 What is your favorite fancy restaurant?**

Any restaurant with a beautiful view of the water is a perfect fancy restaurant for me!

**15 What is your favorite store to go to for clothes?**

I shop at many different stores so it's hard to choose one.

**16 What grade are your kids in?**

10th, 7th and 6th

**17 What are some adult hobbies you have?**

I enjoy taking live cycling classes on my Peloton, and taking my dog Lucy on long walks.

the book, pizza, and play a kahoot in the School Library. The book for this time is "Theodore Boone: The Accused". The book club meeting is on March 20, 2023. Ask Mrs. Cortes to sign you up if you want to join.

**The Read-a-Thon**

The Read-a-Thon is an event where you read to raise money for Paulo. This "Cool the School" fundraiser is meant to help us save enough money to buy an air conditioner for the GYM, the fitness room, and the weight room. So if you're running around like a lunatic in P.E. and you're sweating uncontrollably, this is just what you need. You can always do other things for miniature prizes as well like bookmarks, and erasers for sending things on the FaceBook page and texting.

# COMICS

## KOOL KOOL COMICS

BY: DAVID KAHT

18 What are some of your kids favorite movies to watch?

Some of our favorite movies to watch as a family are Elf, Inside out, The Greatest Showman

19 When is your Birthday?

My Birthday is on May 29th

By Quinn Gao and Karter Cheng

### Meet Lucas!

Meet Lucas Zhang! He goes I.S.34 and he is our newest member of Rice Ink! His first production will be our newest comic: "Code Time!" Please be respectful of the difference between his (Lucas') artstyle and ours (Quinn and Karter) because from now on, Lucas will be producing a few of the comics here at Rice Ink.

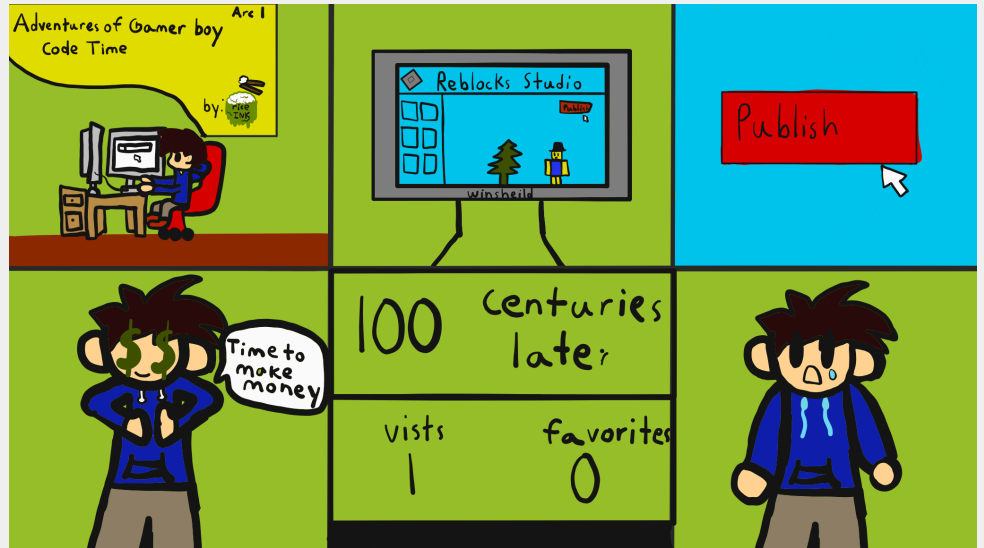

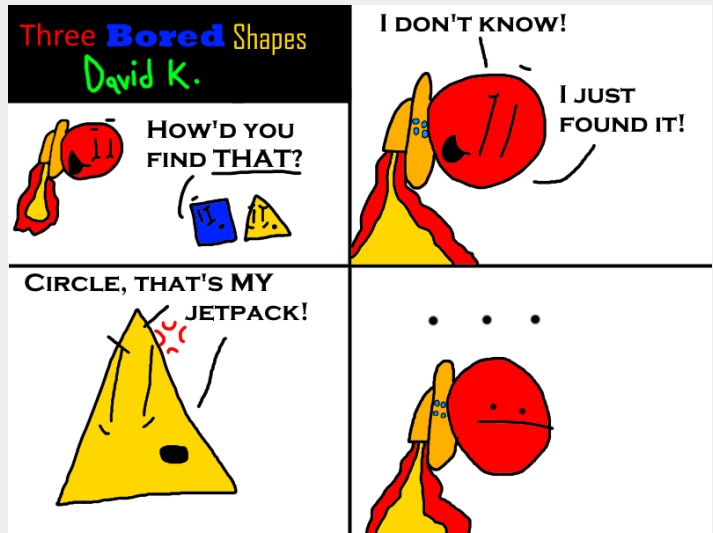

### Meet and Speak!

You may have heard of Discord, with millions of downloads and people talking everywhere. Well, I'd like to tell you about the IS 075 Frank D. Paulo Student Discord Server. Meet people you've never seen, chill, and get homework help!

(This is an unofficial server of Paulo, completely fanmade student server.)
