

Website Concept:

- We would like a nice overhaul of the website, but can keep the same colors and schematics, such as the password entries will be the same, just make the landing pages different enough that people won't think it is the same website.

Video to open with countdown prior to launch. We will tell you when to start the countdown about 1 hour before launch. Video appears after the countdown ends with the "Enter Password" prompt below it. Same socials below as well

Download link: <https://www116.zippyshare.com/v/qSzzzGfS/file.html>

- Password to enter site "Judgment"

Page 1:

Landing page on website similar to our last landing page, with a written script of essentially what played in the video

"Welcome to The Elite, an organization of people whose main goal is to disrupt the cryptocurrency scene, one coin at a time. We are influential, authority figures, innovators and above all else, leaders.

Money is not the root of all evil, it is the route to all freedom. The selfish pursuit of financial gains is a hollow goal, but the pursuit of the goodness that money can create is one of humanity's greatest responsibilities.

Every human is one part of a far greater, eternal design – individual pieces of a puzzle that has no end. Though they may never realize it, a person's actions have the power to alter the existence of the entire world.

The challenges you are about to face will be difficult, even impossible to some. Many will find themselves lost along the way struggling to solve our mind bending puzzles. Do not give up hope. Only the strong will survive. Prove yourself to the council and you will be rewarded with status, riches, and opportunity. We will be waiting for your arrival."

Tokenomics:

10,000,000 Total Supply

Buy/Sell: 12%

Liquidity: 2%
Development: 3%
Community Funds: 3%
Marketing: 4%

0% Team Tokens
0% Dev Tokens
10% Vested Allocations Towards Crypto Twitter Influencers

Button at bottom saying "Are You Ready?" (leads to page 2)

**Before we get into the specifics of the puzzle pages, here is a link to a miro dashboard where you can see our concepts for the puzzles, feel free to embed them anyway you see fit that would make most sense. **

Miro: https://miro.com/app/board/uXjVOuE2Gok=?share_link_id=235825540442

Page 2: First puzzle

First puzzle is a morse code, in which they have to use a program online to decipher what its saying, the easiest way is to download the mp3 from soundcloud directly and uploading it to a morse code audio converter:

Link to morse code:

https://soundcloud.com/the-syndicate-687688260/good-luck?utm_source=clipboard&utm_medium=twitter&utm_campaign=social_sharing

The encoded morse code will say "j8Bs2J7".

Which should be plugged into the end of this url file sharing website: <https://ibb.co/j8Bs2J7> (maybe have <https://ibb.co/> as a hint? Don't know how we can tell people how to input those strings)

Password to enter next puzzle **"We have been hiding in the shadows"**

Page 3: Second Puzzle

<https://pastebin.com/btkau1p1> Long list of coordinates

How to solve: Plot points on Google Maps. Save each coordinate. All pinned points should reveal another string of text (refer to miro to see how it spells out) (we might have to clue people in on how to use these coordinates as we found it was quite difficult to know how to do without telling)

Again we have to figure out how to implement the <https://ibb.co/> link into the site so people know to input those characters into the end of the url

Password to enter next puzzle: **"articulating and planning our next move"**

Page 4: Third Puzzle

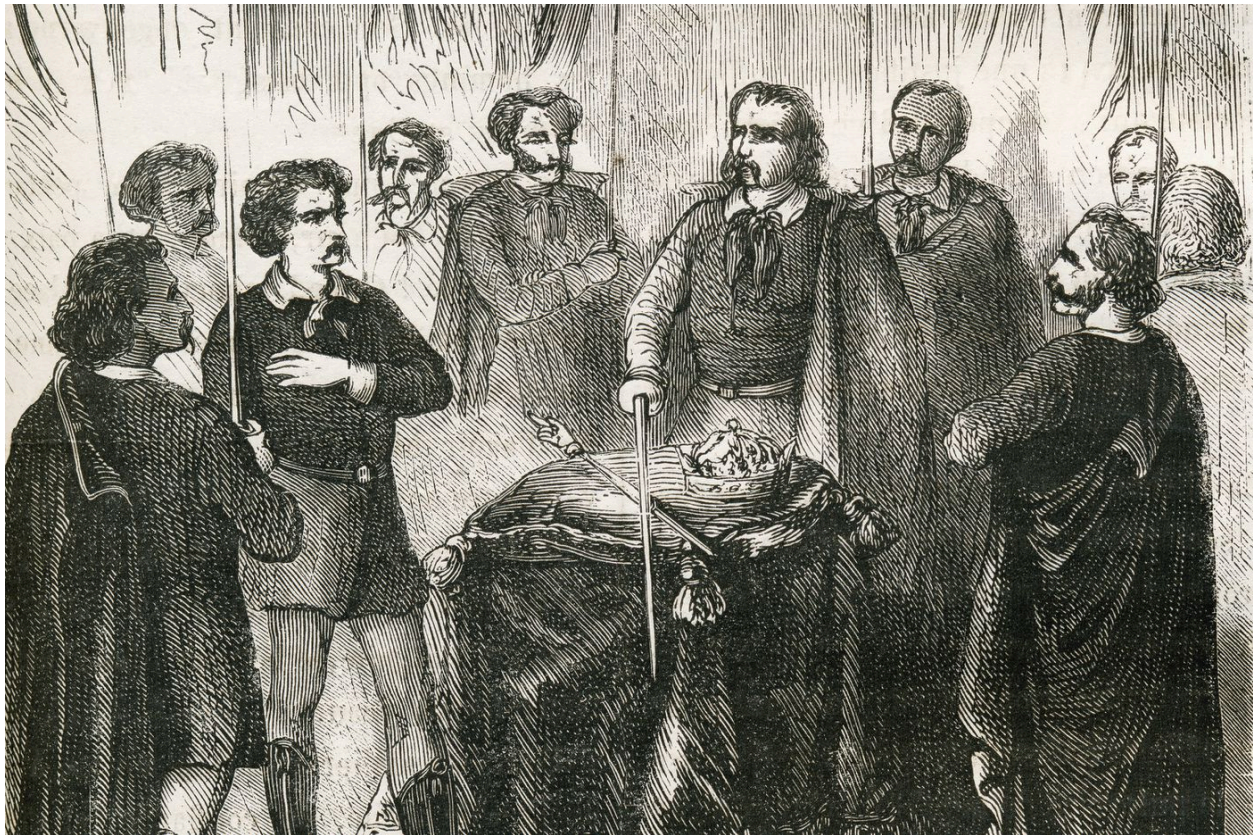

The third puzzle is solved by using this google drives link:

https://drive.google.com/drive/folders/1ljb2z_CYWeKuSyuCjnmcy8kbDHg99DJ

Since we need to be able to see all the different file names (the picture needed is the one with the name ckkcha wlaneokhra, which is a caesar cipher that says google aperisolve, the website needed to decode the picture) we might just have to have the google drive link with a picture of benjamin franklin above it on the page. If you can think of a better way to implement this without using the link that would be awesome, but if not the link is fine.

Password: "a move so big"

Page 5:

Solution: Download Pic > upload to aperisolve > scroll down to strings and follow instructions

Password to enter next page: **"that it will shock the cryptocurrency scene"**

Page 6: 5th Puzzle

Google drive link with tons of QR codes, but when you inspect them closely you will see one is different. If you could display all of the QR codes on the website page, that would be best for this one.

https://drive.google.com/drive/folders/1T54-2qJJCnWArZsMN3ZSi1kt0DP8m_e3

Every QR code in these 5 images is the same except one. When the right one is scanned (QR 3.png #27 code down) it will automatically pull up an email which already has the designated message and subject line. Once sent, it automatically kicks back a message with this link; <https://ibb.co/cgpNsGP>

Password to enter next page: **"This is the beginning of a new era"**

Page 7: 6th Puzzle

Work in progress

ENDING PAGE:

Collabland to alpha group as previous, (new link)

We have been hiding in the shadows, articulating, and planning our next move, a move so big that it will shock the cryptocurrency scene. This is the beginning of a new era, an era where the elite rules over all.

Congratulations. END SITE
