

Dear Mistress Sarah,
This is another speech I have for you to read in public.

The NonImportation Association is a good thing. Because if they *don't* have the ban, they might go out of business because people will stop buying their products because they don't want to pay higher taxes. Also, it *might* help us not go to war. This is why the ban is *good*.

The NonImportation Association is a bad thing. Because if they *have* the ban we will not be able to experience enjoyable things like plays and tea. And *also* because God does not want us to *purposely* make people angry. And *still also* because some

people in **Britain** are losing money *because* of the ban. This is why the ban is *bad*.

My last words for you, my friends, are that the viewpoint in which / would choose is that the ban is bad and *not* a good idea.

Sincerely, Master Ezra
