

Seeds Grow (version A- R & B version)

Chorus

Seeds grow into flowers

Seeds grow into trees

Give them rain and sunshine

Give them birds and bees

Some have wings and some have hooks

Some have a very thick skin

Some fall, some float

Some fly on the wind

(Let's talk about seeds)

Chorus

First they wait, then germinate

Look at the web they weave

When they put down roots and push up shoots

to turn to stems and leaves

Chorus
