

Deep Sky Object Research Project

You are to choose 2 deep sky celestial objects and research the following information. This will be a compare and contrast research paper. The information you collect will act as a guide for your report. **You NEED email me and get your 2 objects approved.**

Any galaxy, nebula or star cluster

Object 1 _____ Object 2 _____

Name (catalogue number and common name)

Description

- Distance (in light years)
- What constellation is it located in?
- Magnitude
- Other descriptive characteristics

- What are some similarities and differences between your objects.

You are to have 1 inch margins, 12 point new times roman font, double spacing, header with name, and title. **You will use APA format for your research paper. NOT MLA. APA is the format research science is done in.**

Length of paper

- Title Page (1 page)
- Abstract (1 page)
- Body (3 to 4 pages)
- Appendix (images)
- Reference page (4 to 5 references)

Images

- 2 high quality/resolution pictures. 1 of each object.

APA Help Guide

<https://owl.english.purdue.edu/owl/section/2/10/>

Google will also format it. There are also help videos on youtube
