

Project overview: As we enter into this unprecedented time in our history, due to the Coronavirus, we want to take time to look inward in order to affect change in our line of thinking. Oftentimes, the conversations we most need to have are the ones we are the most uncomfortable to discuss with others. To change this, we want to increase understanding by learning about diverse perspectives from others around the country through a dialogue based on a shared understanding and experience through the help of Flip Grid. To help us gain and learn these various perspectives, this project is a joint venture between three different schools and areas:

- [Liberty North High School](#) located in Liberty, MO
- [Young Women's College Prep](#) located in Rochester, NY
- [Henderson Inclusion School](#), located in Dorchester, MA

The ultimate goal for this project is to listen and learn from one another to better equip ourselves to disarm bias in the future.

Driving Question: How do we recognize, understand, and reduce bias?
