

Similarities/differences between Upper Sackville and Lincolnville landfill issues		
Similar	Upper Sackville	Lincolnville
First-gen landfills built before regulations were in place.	A liner was retroactively added to catch toxic garbage water.	Garbage was simply closed and buried.
Damage from landfill due to proximity.	<ul style="list-style-type: none"> ● Residents received financial compensation for the environmental damage. ● Some residents were relocated because of the foul smell. ● Act was ratified which prevented the placement of a landfill in the community in the future. ● After closure in 1996, multi-million dollar filtration system was installed to protect the groundwater from toxic garbage water. 	<ul style="list-style-type: none"> ● Even though Lincolnville's landfill was closer, they did not receive compensation. ● Still dealing with a degraded liner today. ● Still waiting to be compensated.
