

Proposal:**Assumptions:**

1. Reality/Existence is symmetric in every way. (Total Matter + Antimatter remains same, maintaining symmetry.)
2. Dark Energy/Matter is the “inverse” of Energy/Matter.
3. Reality/Existence has no beginning or end, it’s a cycle that starts with a Big Bang and ends with a Big Crunch, essentially, “pulsing”.
4. Entropy is the ticking timer that dictates the “mid-point” of the cycle.

Therefore:

1. Symmetry is always maintained.
2. You can only “convert”.
3. In order to maintain symmetry, “conversion” requires “something”.
4. Every cycle is an iteration that gets refined every restart.
