Have a short discussion on the history and processes of pixel art A History of Pixel Art Pixel art is a form of Digital Art, created through the use of raster graphics software, where images are edited on the pixel level. Graphics in most old (or relatively limited) computer, console, graphing calculator and mobile phone video games are mostly pixel art. The term Pixel Art was first published by Addie Goldburg and flower report of the pixel art in SEQ. The concept, however, goes back about 10 years before that, for example in Richard Shouy's SuperPixel system in 1972, also as former MAC. Some traditional art forms, such as counter-thread emborishing (including cross-relativel) and some hinds of moste and beadwork, are very similar to pixel art. These art forms construct pictures out of small colored units similar to the pixels of modern digital computing.	Feel the pride of being a Filipino with Tatsing. This game promote healthful lifestyle. Furthermore,they promote: patriotism(to feel the pride of being Filipino) Bonding(to build bridge of fun and closeness among neighborhood to develop camaraderie with peers) and sportsmanship (to build a positive outlook on acceptance of winning and being defeated
