Parallel (convergent?) evolution example: flying squirrels, sugar gliders, colugos

Flying squirrels (rodent in the squirrel family found in North America and Eurasia)
(North american flying

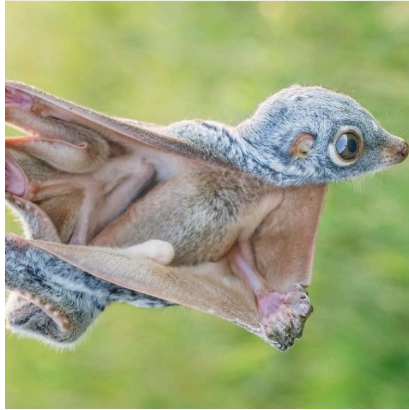

Sugar glider
(Gliding marsupial in the possum family found in

Colugos (flying mammals found in Southeast Asia. Their closest relatives are

squirrels have been found to fluoresce pink!)	Australia, New Guinea, and Indonesia)	primates).
---	---------------------------------------	------------

Cuter picture of a colugo to rinse your eyes after seeing their weird semi-hairless underbellies:

Incredible starling murmurations:
