Abstract. This is a full paper template for the *6th International Conference on Engineering and Computing Technologies (ICECT VI)*. All papers must have an abstract to be written underneath the author's information, approximately 150-250 words, in 11-point Times New Roman. Please leave two spaces between the Abstract and the heading of your first section. Please save your paper as a Microsoft Word PC format. Any other format will not be accepted.

Keywords: *one, two, three, minimum three keywords*

1. INTRODUCTION

Please note that the first paragraph of a section or subsection is not indented. The first paragraph that follows a table, figure, equation etc. does not have an indent, either.

Separate paragraphs should be spaced by a single line.

1.1 SUBSECTION SAMPLE

You can have several sub-headings if you feel they can improve the conciseness of your manuscript.

2. EQUATIONS

All equations must be centered and consecutively numbered. Displayed equations should be numbered simply as (1), (2) and so on. Displayed equations are centered and set on a separate line.

The numbers should appear at the right of the line in parentheses as follows:

$$\sigma_t^2 = \omega + d_1 D_1 + \dots + d_n D_n + \alpha_1 \varepsilon_{t-1}^2 + \gamma \varepsilon_{t-1}^2 d_{t-1} + \beta_1 \sigma_{t-1}^2 \quad (1)$$

To refer to your equations, use "(1)", NOT "Eq. (1)" or "Equation (1)", except at the beginning of a sentence: Equation (1) is...

3. TABLES AND FIGURE

Tables should only be used to improve conciseness or when the information cannot be given satisfactorily in graphs. Tables and figures should be numbered serially and referred to in the text by a number (Table 1, Fig. 1 etc.). Each table and graph should have a caption which should be concise and self-explanatory. The caption for tables should appear on top while the caption for figures should

appear at the bottom. Statistical significance if applicable, should be clearly stated in the captions of each table or figure.

Table 1. Table captions should be placed above the tables.

No	Item	Description
1	Item 1	Description 1
2	Item 2	Description 2
3	Item 3	Description 3
4	Item 4	Description 4
5	Item 5	Description 5

Please try to avoid rasterized images for line-art diagrams and schemas. Whenever possible, use vector graphics instead (see Fig. 1).

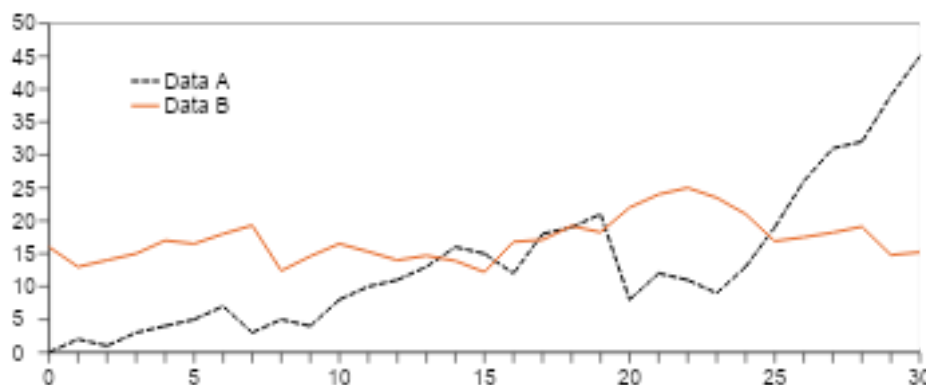

Fig. 1. A figure caption is always placed below the illustration. Short captions are centered, while long ones are justified. The macro button chooses the correct format automatically.

4. CITATIONS AND REFERENCES

All citations and references must follow APA-style citations. You can refer to the examples as laid out in this article. For more information regarding citations, please refer to the APA style website (American Psychological Association, 2016; Lester, J. D., & Lester, J. D., 2012)

5. PLAGIARISM POLICY

ICECT VI does not encourage any form of Plagiarism and duplicate submissions. Hence, we strongly recommend our authors to thoroughly check the article's content before submitting it to our conference for publication. We request our Authors to use Turnitin software to check plagiarism prior to submission. The acceptable similarity index is less than 20%.

If the plagiarism is observed by editors, peer reviewers or by editorial staff at any stage of the publication process, it could be rejected based on the percentile of plagiarism occurring and it would be notified to authors.

6. CONCLUSION AND RECOMMENDATIONS

You can highlight the significance and novelty of your work, and your future plans related to the topic studied. Suggestions of related studies that can be pursued by other researchers based on your work are also welcomed.
