

It is time to talk about Facebook and Instagram owner Mark Zuckerberg. He is committing treason by not following the law of this country when he should be obligated to do so. So what is going on with our data? Furthermore, how are our voices to be used against us in the future?

Mark Zuckerberg is a traitor. He has betrayed the American people by giving away our personal information to Russians, China, and other foreign entities. In addition, he is accused of stealing data from Facebook users to influence the 2016 and 2020 presidential elections.

Mark Zuckerberg is committing treason by demoralizing people. He allows sexualization of children in posts and promotes those who want them to have surgery to become something else. Facebook promotes perverse subcultures and censors those who like traditional ideas. This is a weapon to break down the family and make men weak. Moreover, he is growing quite a monopoly. The truth of the matter is, he bought up a company called WhatsApp with his own money in 2014 - which Facebook later acquired for \$19 billion. Now, WhatsApp had end-to-end encryption back in 2016, but it was still not secure enough for Zuckerberg's liking, so they eliminated it by April 2017

Mark Zuckerberg and Facebook have been accused of treason for their role in the 2016 Presidential election. The accusations are based on a recent report from the Washington Post that shows how the company knowingly sold ads to Russian actors.

Facebook and Instagram are banning conservatives.

"We are sorry to hear that you have been banned from our site. However, if someone has a Facebook account, we can ban the Instagram account simultaneously! Noone will not be able to post anything on either side if they are banned on one."

Be careful what is said or done because it could get banned from these sites for good! Even comments get banned. It is not worth the risk of being kicked off of two social media platforms in one day, so please watch what is said and done online. Try not to mention the words GLOBAL COMMUNISM or talk about any vaccine injury. Actually, delete these APPS for good! Talk freely on another app.

Do not be like this guy who got himself banned from both sites in just one day! Furthermore, he had no backup accounts with any followers. Instead, sign up at Telegram, Gab, or Gettr! Delete Instagram and Facebook accounts now.

We need help to make this happen. Demand that he be removed from his position as CEO of Facebook Instagram! It is not too late for justice! Let us take back what belongs to us--our privacy!

Anyone can sign the petition demanding Mark Zuckerberg be removed as CEO of Facebook Instagram!

Mark Zuckerberg is a traitor to our country. Facebook and Instagram are the most popular social media platforms, but they have been caught stealing data and censoring conservatives. It is time to switch to a platform that respects its clients! That will not delete years of personal posts and investments in a cherished business. That is time and money!

Join Gab today for free, where they do not censor conservative voices or steal your data. Instead, they are building a new type of social network – one that puts people first. Furthermore, it is powered by crypto-currency, so it will not cost anything to use it! Americans deserve better than what these two companies have given - join us now and be part of the movement towards an open internet!

Click this link right now and sign up for Gab.ai for free!

Mark Zuckerberg has banned conservative accounts from Facebook and Instagram. If they think anyone looks like the same person that was banned, they will ban again. They have bots and censors that will put warnings all over posts. Even if it is similar to another post-banned, it is gone. Everyone will get a strike even if using a specific language. I remember when noone could not use the name "David Hogg" or "Kyle Rittenhouse." It was instantly blocked. They also block any commentary of vaccine injuries people are having. This is causing more people to become injured or die.

This is a violation of the first amendment, which guarantees all Americans the right to free speech. The only way to fight back is by sharing this post with friends and family, so they know what is going on. We need everyone we can get to stand up for our rights!

Mark Zuckerberg also has been all over China treated like royalty. He wanted to name his baby after President Xi of China. The communists!

Facebook and Instagram are both owned by the same company, which is why they share many features. They have also been accused of sharing data without consent. You are the product they sell. Nothing is free.

Facebook Messenger tracks everything done on a phone. The app records all searches. All audio and video are also recorded. Then corporations target with ads. Furthermore, even if someone deletes an account, they are still tracked.

It is time to delete these apps from cell phones. If not, then at least change their privacy settings not to have access to all of information and photos anymore. Americans deserve better than this - it is time to control what happens with data on social media platforms like Facebook and Instagram!

The only way we will stop them is if we make sure our voices are heard loud and clear! Click or sign petitions demanding Mark Zuckerberg resigns as CEO of Facebook Inc., or else he will be charged with treason against the United States government for his involvement with banning politicians, like President Trump. Zuck the Cuck, has covered up for big media and big pharma for years.

Let us show Zuckerberg that he does not have power over us anymore!
It is time for Mark Zuckerberg to step down. He has violated billions of rights and harvested people's data in cruel ways. His negligent leadership has got us into this mess.

Please share this post with friends and family so they know about what is happening!
