

Greetings Glenridge Families!

My name is Brendan Kearney, and I have the honor of serving as your child's science teacher. For those of you who do not know me, I have proudly been teaching science here at Glenridge since the lab was opened in 2010. Prior to that, I taught for nine years in the Pattonville School District as a 4th and 5th grade classroom teacher. My passion is forever kids, and I've always loved science... so, teaching science is naturally my jam!

My goal is to ignite the innate curiosity and wonder that rests in each child's heart, and to expand and sustain that inquiry through engaging experiences. I also desire for my students to develop a deep appreciation for the impact of science in their lives outside of school, realizing the importance behind what we learn in the lab and how it can be utilized to succeed in life.

I am a firm believer in reflection, growth, and communication - always seeking ways to improve my practice and to make stronger connections with the people around me. I invite you to join me by reaching out with any questions, comments or concerns you may have as the year progresses. *I would also like to welcome you to share with us any expertise you may have with regards to the science content being taught this year OR if you might be willing to share your knowledge and skills in our District-wide Science Fair this year. **Please connect with me to set up an opportunity to help make our learning come alive with the real-world connections you have to offer...students LOVE welcoming guests from our community!***

Please use [this link](#) to access the family letters for each of our units in science.

Thank you and take care!

Brendan Kearney
