Activity Analysis

Please answer the following questions based on the creation of your own math quiz!

1. *How many total questions did you have? Do you think it will take your students around 30 minutes to complete?*

2. *How many questions require the learner to use procedural knowledge?*

3. *How many questions require the learner to use conceptual knowledge?*

4. *What was your ratio of procedural to conceptual? Was it near 50/50?*

5. *Why do you think your ratio worked?*

6. *Lastly, do you feel that your quiz was fair? Did you give your students a good chance at succeeding?*
