Privacy Policy for SellSen Chrome Extension

Last updated: 25.02.2025

At **SellSen**, we are committed to protecting your privacy and ensuring that your personal data is handled responsibly. This privacy policy explains what data we collect, how we use it, and how we protect it when you use the **SellSen Chrome Extension**.

1. Data We Collect

The **SellSen Chrome Extension** collects and processes the following user data:

- **Authentication Information:** When you log in to SellSen via the extension, we collect your **username** and **password**. This data is transmitted securely to authenticate you with the SellSen platform.

2. How We Use Your Data

The collected data is used exclusively for the purpose of authenticating you into the SellSen platform, which allows you to access your account and use the services offered. Specifically:

- **Username and Password:** These are used to verify your identity and authenticate your session within the SellSen platform. This data is sent to the server only temporarily for the authentication process.

3. Data Storage and Protection

We do **not** store your authentication data (username and password) on our servers. The data is used solely for session authentication and is not retained after use.

- **Authentication Token:** If the authentication is successful, an **ID token** may be generated and used temporarily for maintaining your session.

We take all necessary measures to ensure that your data is transmitted securely using **HTTPS** encryption.

4. Sharing of Data

We do **not** share your authentication data with any third parties. Your data is used solely for the purpose of accessing the SellSen platform.

5. Permissions

To provide the functionality of the extension, the following permissions are required:

- **Storage:** Used to store temporary session data for user authentication.
- **ActiveTab & Tabs:** Allows the extension to open and interact with Amazon and SellSen pages.
- **ContextMenus:** Enables interaction with context menus (right-click options) on the browser.
- **Scripting:** Allows the extension to inject scripts into web pages to enhance functionality.
- **Host Permissions (https://sellsen.com/*):** This permission allows the extension to communicate with the SellSen website for authentication purposes.

These permissions are necessary for the proper functioning of the extension, and no user data is collected or stored beyond what is required for authentication.

6. How We Protect Your Data

We take the security of your data seriously. All communication between the extension and SellSen servers is encrypted via HTTPS. We also ensure that no sensitive data, such as passwords, is stored on the extension or the servers after authentication.

7. Contact Us

If you have any questions or concerns regarding this privacy policy, or if you would like to know more about how we handle your data, please contact us at:
