### Subject Line: The Secret To Success

I strongly believe that to be successful you must have a plan. It can be really simple to follow it if you know what to do.

Before I became massively successful at the age of 23, I was working at an office job for a company.

Every weekend, I used to have coffee with one of my friends and he would always talk about how he started this brand-new business and how he was starting to make money from it.

I didn't think much of it since he was only making a couple hundred dollars from it and the job that he still had didn't pay as well as mine.

After a couple of months, he would still pay me a visit every weekend to have a coffee at my apartment and we would sit and talk for hours, and hours.

And every time he would talk about his business and how it was growing each day from \$100 to \$1,000, to \$10,000, to \$100,000 per **MONTH**.

And that day, I felt like I HAD to change. I felt it. It was the day.

So I asked him how could I get started, and since it was a Saturday night, he invited me the next day to explain to me how his business model works and how he could help me grow mine too.

**5 Months** later, I became a **MILLIONAIRE** all because my friend helped me in this journey.
