

Privacy Policy – XREF Address Match Alert

Last updated: June 18, 2025

1. Overview

XREF – Address Match Alert is a Chrome Extension that detects and compares addresses across web pages. It requires users to sign in via Google OAuth2 and is designed exclusively for authorized use.

2. Information We Collect

- **Active tab content and URL** – Used to extract and compare addresses.
- **Google account email** – Used only for authentication and authorization.
- **Local storage data** – Includes settings, session data, and search results, stored on the user's device.
- **Interaction data** – Captures in-extension actions like button clicks for functionality tracking.

No personal or sensitive information is collected.

3. How We Use Your Information

Data is used solely for:

- Verifying user identity and permissions via Google.
- Performing address match functionality in the user's browser.
- Enhancing user experience locally.

We do **not**:

- Share or sell user data.
- Track users outside of the extension.
- Store information externally.

4. Data Sharing

No data is shared with third parties. All processing occurs on your device.

5. Security

- Google OAuth2 ensures secure authentication.
- No remote data transmission aside from essential OAuth calls.
- Extension operates only while actively used.

6. Your Choices

- Uninstall the extension anytime via Chrome.
- Revoke sign-in credentials through Chrome's `chrome.identity` tools.
