

Date & Time: 12/15/2022

Location: Millard's Workshop

Coaches present: Millard Gold

Members in Attendance: Preston and Evan

Task:	Reflections:
Make adjustments to Drive.Forward_Auto	We had a problem where the bucket would sometimes not go up when using Drive.Forward_Auto. That method was changed from using a "State" format to just a series of Thread.sleeps between the different parts of the loading process
Work on "Right Auto" to handle different scoring options based on the final parking position	We worked through Parking Center and half of Parking Right. Although it was cool to see the robot score on the floor junctions, it's not as reliable as scoring on the low pole. So the plan going forward is to score on the medium and low pole.
Do Driving Practice	Evan and Preston spent a little time practicing unloading the stacks and scoring which went pretty well.
