Purpose: The Beyond Compliance Network facilitates the (re)design of compliance data systems to strengthen environmental governance. This convening will build on conversations from an initial virtual convening in March that began building a network of data stewards, curators, managers, and researchers. We will share updates, discuss and ask for feedback on ongoing projects, elicit ideas for other projects, and continue building out a roadmap. Ultimately, we hope this network can act collectively to change current environmental data and infrastructure systems to be more open, accessible, and interoperable.

Prior to the Convening

- **Draft Toolkit language:** Please review this [language drafted](#) by the toolkit small group. Feel free to add comments or suggestions directly to the document, or come bring them to our meeting.
- **Knowledge Exchange Survey:** Please take a few minutes to fill out this [3-question survey](#) about what you'd like to share or learn about with this group, as well as who you'd like to invite in.
- **Event Code of Conduct:** Please review our [Code of Conduct](#).
