

Using e-link

Follow these steps to create your content.

- > Go on [e-link](#) and create your account
- > Select create a new post
- > Go to ***start from scratch*** (you can also click on **choose a template** to insert your information on a predesigned template). However, I suggest you keep it simple by choosing the first option.

>Open another window on the web. ***Select the images*** or videos you want to use.

Right-click on any image and select ***copy image address***

> Go back to e-link, use the link you copied on the web in the ***paste any link area at the left of your screen***. You can use up to 5 links for the free version.

> Use the ***edit button*** to add your script (paragraph) under the images or video.

> **Save** your work.

> Click on the **share button** to **copy the link** to your clipboard

>**make sure the link is active**

>**Copy the link and insert** it to your post.
