Privacy Policy – ChatGPT PDF Exporter (Chrome Extension)

Purpose. The extension's sole purpose is to let users export conversations from chat.openai.com as clean, print-ready PDFs.

Data processing. All processing happens locally in the user's browser. The extension does **not** transmit chat content to our servers.

Third-party. If the user enters a Pro license, the license key is sent directly to the official Gumroad API only to verify the purchase. We do not store the plaintext key; locally we only keep an activation flag and minimal metadata.

Permissions. Access to `chat.openai.com` is required to read the currently visible conversation for export. Access to `api.gumroad.com` is required to verify Pro licenses on user request.

Analytics/Tracking. None.

Data sale/sharing. No sale or transfer of user data to third parties.

Contact. For questions or requests, email victusdevelopments@gmail.com
