

CAPTIONS TUTORIAL

Word by word HighLight:

Make Captions from Transcript

Now cut the captions word by word along with narrative

Now color each word in each cut

So you will get highlight effect

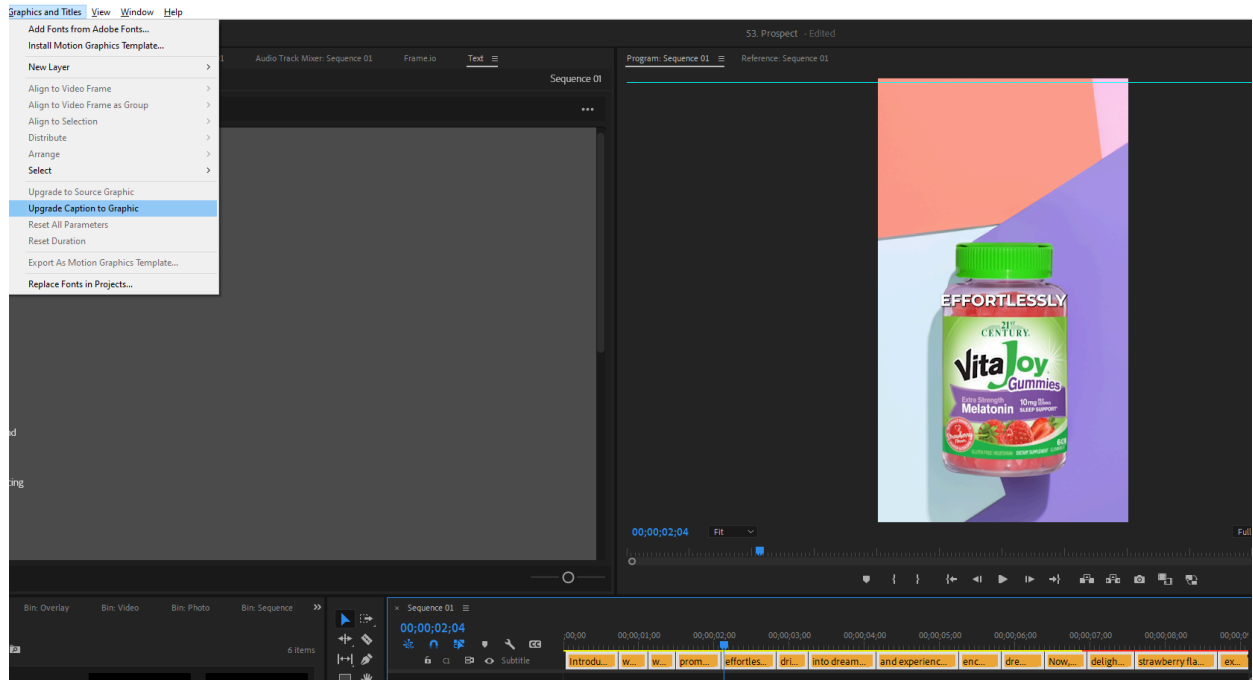

Repeat for every word

Be careful what cut your coloring

Blurr Transition:

Transform captions into graphics

Duplicate captions with holding Alt + dragging highlighted captions on another layer

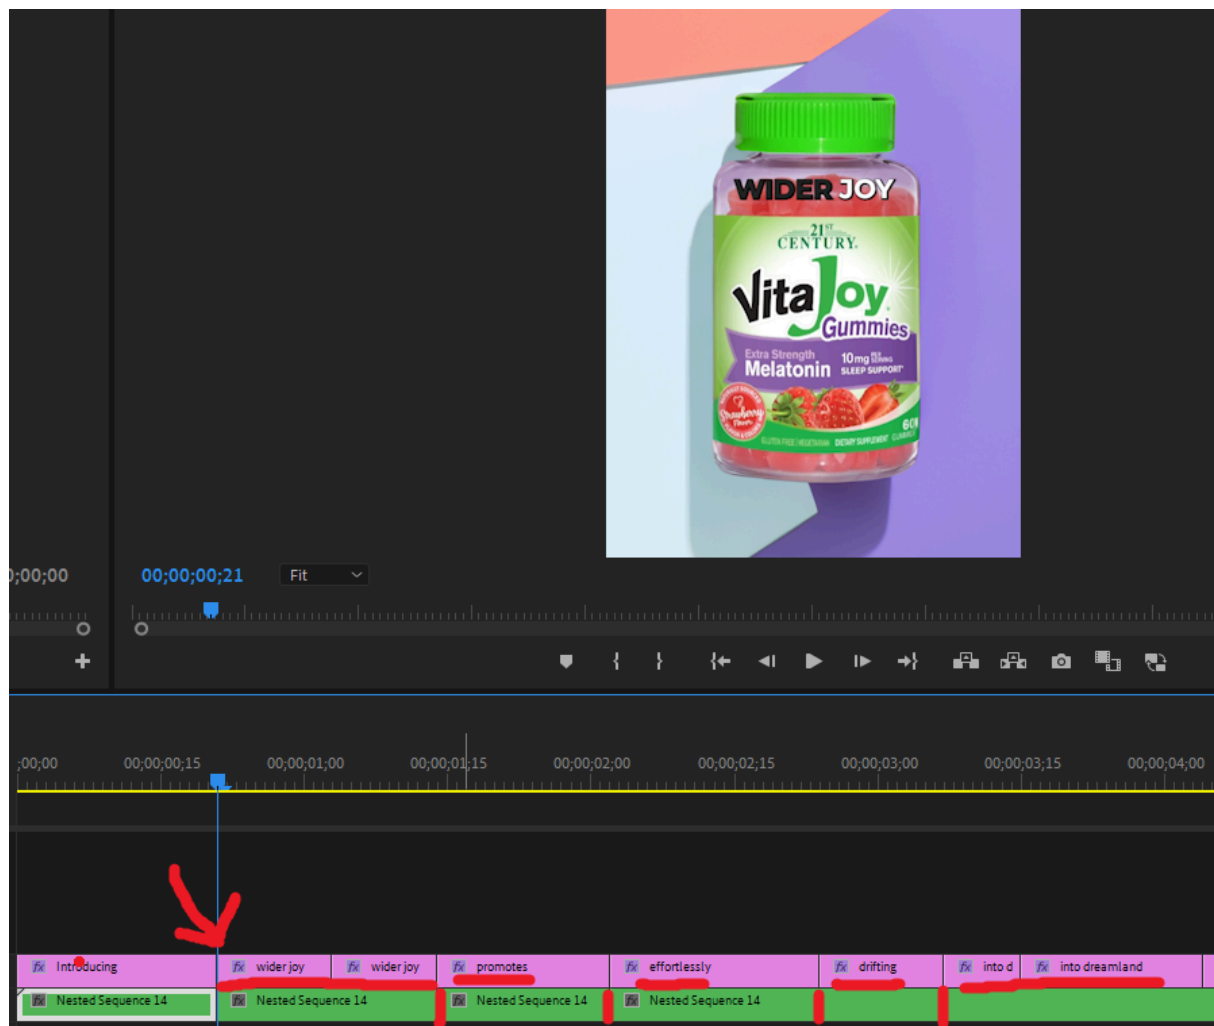

Nest bottom captions

Make cut where new words are said

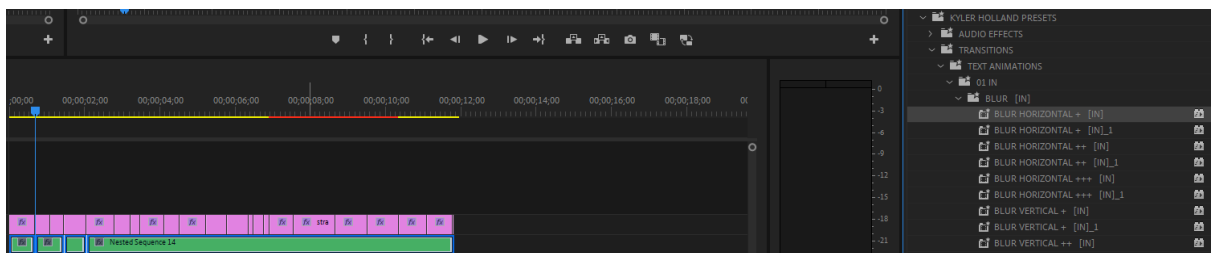

Top layer of captions is for help with this cutting step

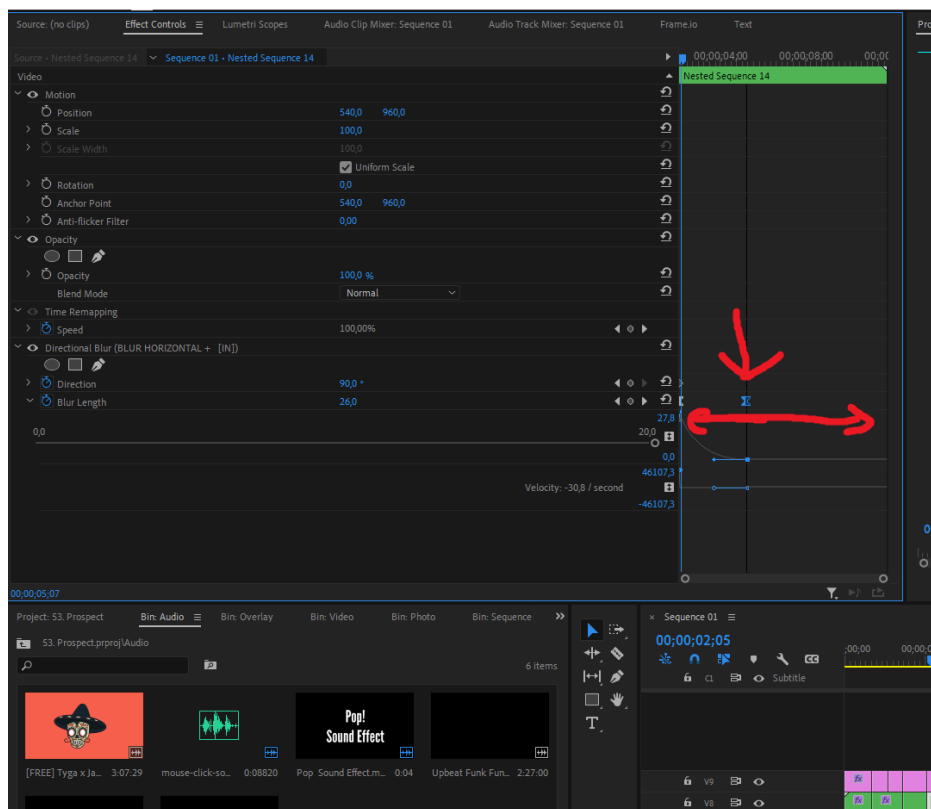

Apply this effect on whole nested layer

Link for Effect:

<https://assets.kylerholland.com/p/text-seamless-scale-width-up-down-mogrt/>

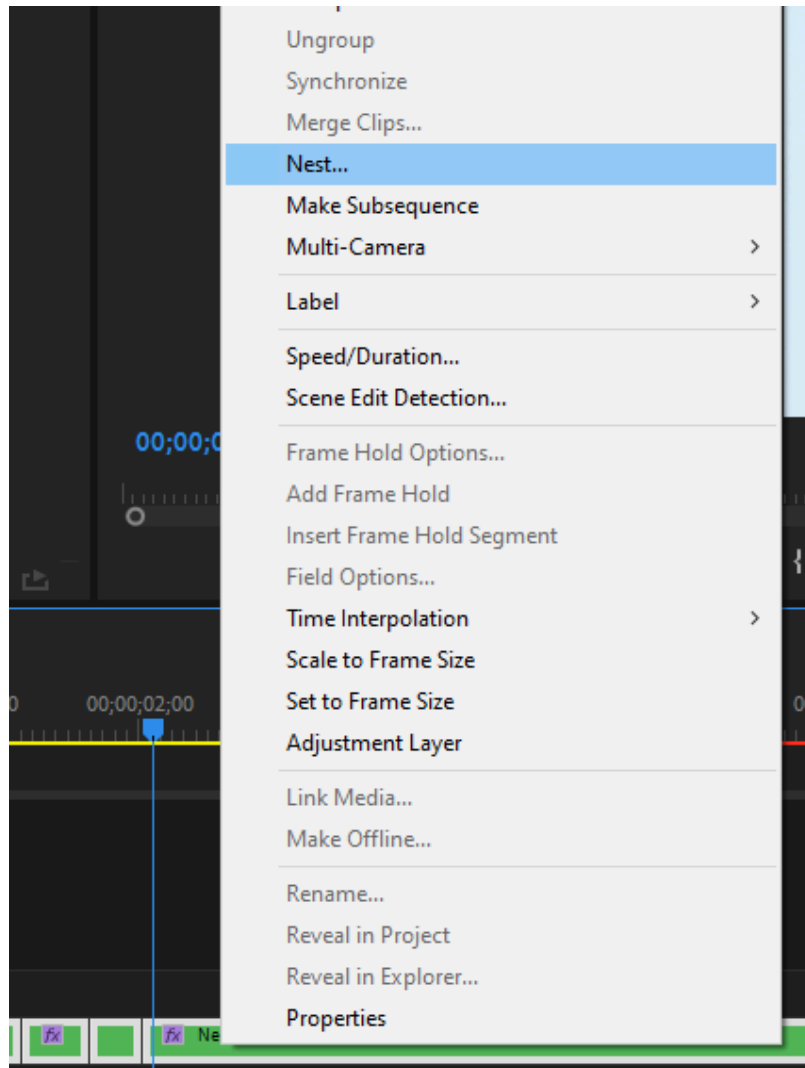

You Can adjust how long it will be the effect

Text Movement:

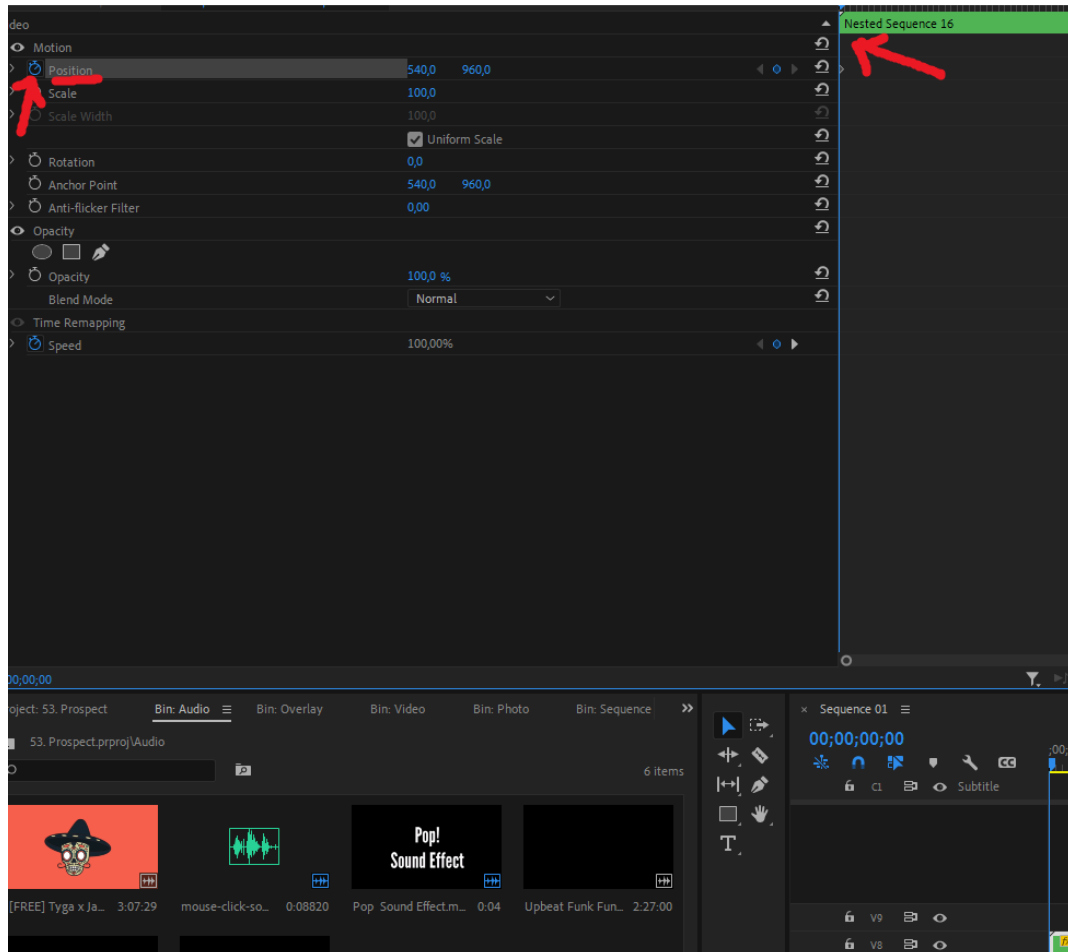

Delete top layer

Nest the bottom layer again

Go on start of the captions in timeline

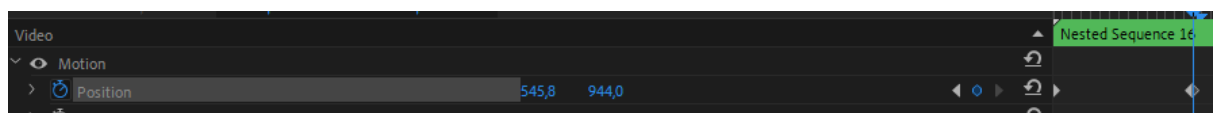

Click stopwatches on “Position”

Move 20 frames (shift + right arrow- 4x)

And make small moves with position

- Use Ctrl for smaller moves

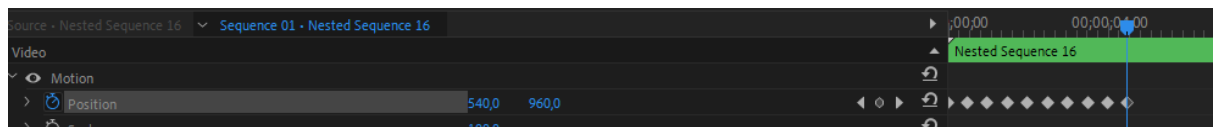

Repeat 10 times

Then make copy them and paste them to make effect longer

Repeat for whole layer

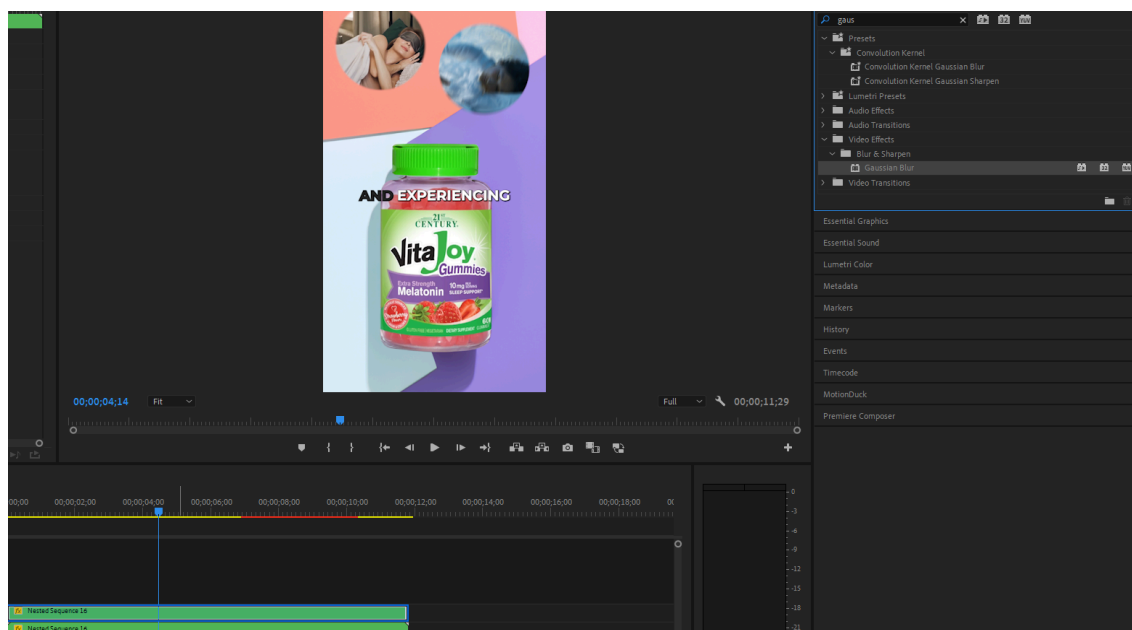

**Make sure when you paste Keyframes
You are on last made keyframe with playhead**

Glow Effect:

Duplicate Nested sequence

And add “Gaussian Blurr” on the top one

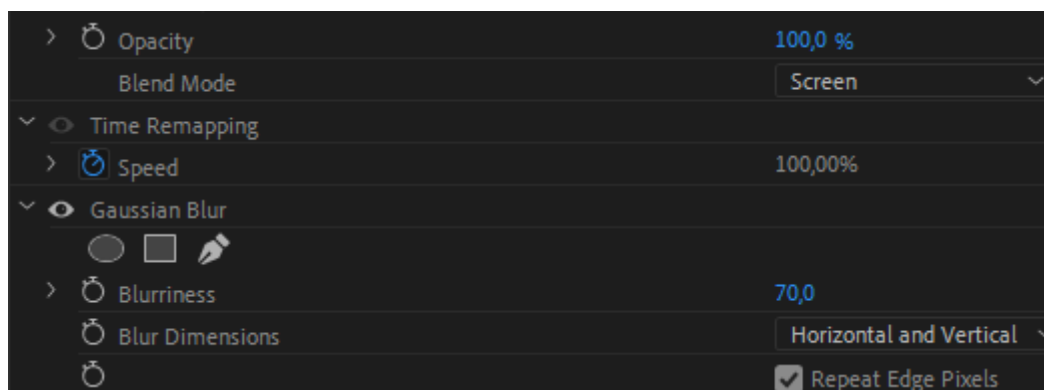

Gaussian settings

I use 70 for blurriness

And “Screen” for Blend Mode

Play around with it

Congrats You made Your own VIRAL Captions

If you´ll need further help
