QA Engineer

Gamesys Corporation, London

Jul 2015 to Sep 2018

Gamesys is on a mission to become the world's most entertaining online gaming company. It all started with Jackpotjoy but along the way we have grown into the award-winning team of designers, developers and operators behind some of the leading gaming sites and apps including Virgin Games and Caesar's Casino. But we haven't stopped there... we're also behind Bingo Lane, Jackpotjoy Slots and other great free-to-play games.

- Delivery of new games and features across company's international and B2B websites
- Help define UAT and drive automation
- Write the stories in BDD format and test cases using gherkin syntax
- Test server-side (Java) and client-side (Flash/AS3/HTML5) solutions.
- Work in a team using the Scrum agile methodology.
- Occasionally running agile sprint planning and scrum meetings
- Helping the teams to continuously improve processes, techniques and performance
- Collaborate with stakeholders as well as the team, raising risks early on in the SDLC
- Taking ownership for the quality of deliverable features and functionality
- Work with the developers in test to increase test coverage
- Understanding code by improving the quality of the tests being automated
- Mentoring junior members of the team
- Creating test plans and test cases, documenting them effectively
- Continually reviewing test scripts and plans
- Perform mobile testing on various devices and different operating system
- Perform front end and back end testing activities
- Work with the automated testing tools
- Sharing knowledge via documents, training sessions and presentations
- Working with offshore company (Colleague)

Testing exposure:

- Understanding of cross browser and cross platform testing and Web based application testing
- Work using selenium web driver
- Strong understanding of Unix and Windows environments
- Debugging and analysing logs using Splunk & Kibana
- Proven ability to design test plans, scripts and supporting documents to deliver testing in functional areas
