

Which Type of Residential Fence is Right for Your Home | A1 Fence LV (702) 504-0765

Residential Fence. The use of fences in your backyard or yard is a great way to create a boundary between your property and the rest of the world, especially for kids. You can build your kid's a nice little getaway in your backyard by building a swing set, a playhouse, and enclosing with a privacy fence, a mini-woodshed. With so many different options, there's no need to limit yourself to just gates! Residential Fences, as well as gate systems, are available in vinyl, aluminum, wooden, and netting materials.

Aluminum Driveway Gate. An aluminum driveway gate is an inexpensive, attractive option to an expensive, custom fence. Many companies offer a full assortment of aluminum fencing for both residential and commercial applications. You can choose a plain flat top or a decorative aluminum swing set and enclosures. If you want a more customized look, consider purchasing a pre-fabricated aluminum fencing panels, which allow you greater design flexibility and a one-of-a-kind design. These panels are available in pre-manufactured and unfinished models.

Wooden Plank Gates. Wooden gates can be a traditional baluster style, or a more modern, decorative design. For a more budget-conscious option, you might consider a new style of wooden swing set gates. Residential and commercial customers will find that wood-framed gates work best as an accent piece and not as a barrier between your yard and the rest of the neighborhood.
