

Wake Forest University Cybersecurity Checklist

Is it time for a checkup? Stay ahead of the bad guys with this quick and easy list of cybersecurity checks for your Wake Forest account, custom-built by IS.

- ☐ For the most secure WFU mail experience, use **native Google Mail apps**, which include helpful security features and external sender alerts to keep your accounts safe. Other mail apps (such as Apple Mail and Outlook) lack these alerts and features, leaving you more vulnerable to hacking or phishing ploys. 
- ☐ On your laptop, use mail.google.com to view and manage your WFU mail account. Easily separate work and personal accounts using [Chrome profiles](#).
- ☐ On Android, [use the Google Mail app](#) from Google Play.
- ☐ On iOS, use [Google's Mail app](#), from the Apple App Store.
- ☐ Run a [Google Security Checkup](#) from your @wfu.edu and personal Gmail profiles
- ☐ Set up an easy, [secure biometric passkey](#) as one of your Google 2-step options
- ☐ Set up an **auto-lock for your laptop** after a period of inactivity
- ☐ Take your annual cybersecurity training or revisit any time you would like a refresher.
 - ☐ Students: go to knowbe4.com/homecourse (pw: **homecourse**)
 - ☐ Faculty and staff, go to [KnowBe4](#) and sign in with your @wfu.edu account.
- ☐ Visit the Infosec Site [Security Essentials](#) any time you need a refresher
