Subject	Gaining Motivation/Inspiration Focus Pill

When you sit down to get some work done whether it be homework for school or paperwork for your job, can you honestly say you are 100% focused, can you honestly say you are using your time efficiently?

Let me guess you have little to no motivation at all.

The work seems draining and lifelong.

There's no real enthusiasm and eagerness to get the job done.

Sometimes,

You don't even remember the important task at hand and get easily distracted.

If this is ringing a bell, then the people at QUALIA have developed a premium focus pill to help you get through that late-night work.
