Plan for a SoTL Project

by replace with your name, institution

Research Question
What are you curious about?
What would you like to know about strategies that might hinder and/or help students to
learn, in your course? Do you want to know if an activity assignment, or teaching stratogy "works?"
Do you want to know if an activity, assignment, or teaching strategy "works?"
Do you have a question about how to help your students learn a particular skill?
Identify shallongs foutcome related to learning that is related to your question
Identify challenge/outcome related to learning that is related to your question.
Describe the learning in a way that suggests how you might <i>measure</i> it using either qualitative or quantitative methods.
Describe the learning in a way that suggests how you might <i>measure</i> it using either
Describe the learning in a way that suggests how you might <i>measure</i> it using either
Describe the learning in a way that suggests how you might <i>measure</i> it using either
Describe the learning in a way that suggests how you might <i>measure</i> it using either
Describe the learning in a way that suggests how you might <i>measure</i> it using either
Describe the learning in a way that suggests how you might <i>measure</i> it using either

Describe the instructional activity, assignment, or teaching strategy that promote student learning on the outcome you identified. SoTL projects might investigate the impact of a <i>modification</i> to an existing strate assignment. Describe how the new approach differs from the old approach and modification might change student learning on this outcome.	gy or
Describe the evidence that would persuade an external audience that the new or modified teaching strategy improves student learning on the targeted learning outcome. Describe the evidence you would need to collect to answer questions about the value of this teaching strategy. How would you convince others that this approach than other approaches? What comparisons should you make? Examine students before and after the assignment? Compare students who complete the learning another group of students — what comparisons would be meaningful?	impact or th is better ; skill
How and where would you publish, present, or disseminate this work?
