## Project Proposal

[Complete this project proposal and then upload it to your Launchpad Profile.](#)

**Project Title:**

Pratt Financial Modeling

**Project Product (highlight all that apply)**

- App/Website
- Invention/Prototype
- Experiment
- Art
- Creative Writing
- Computer Science
- Music
- Digital media (film)
- Community Service
- Mindfulness
- Other (describe) -  
Excel sheet with a  
completed DCF  
model.

**What is your proposed project topic? (This can be the question you want to answer.)**

To create a Pratt Financial model on microsoft excel utilizing all the tools and pulling data from cash flow, balance and income sheets for a corporation. This will be completed for one specific equity.

**Why did you choose this project? What is your project inspiration?**

## Discover

### Make a copy!

I chose this project because one day I want to manage a hedge fund and be a CIO. Being able to calculate intrinsic value to determine where the stock price might move is huge. This will also help me with my current investments.

### **How will this project be a learning stretch for you? What will you learn by completing this project?**

This is a professional method for calculating intrinsic value, most finance majors don't learn this until their final semester of college. Still being in high school this will teach me a lot and give me great experience. I will also be more advanced in excel sheets.

### **List the materials, supplies, technology and resources you will need to complete the project. (computer, iPad, paper, Arduino, poster paper, etc.)**

Computer, Microsoft 365 Office, references to learn from (online)

### **How will you work with others during this project? What will you need from other people during this project?**

I plan to complete this project for the most part independently, however I will need to learn some of the process online and I plan to have an experienced individual check it over at the end.

### **What do you plan to create for your final product? (Describe what you are going to produce. Is it a lab report of an experiment? A film? A website? An app? A work of art? This description should be specific and should be a fully developed paragraph.)**

For my final product I plan to create an excel sheet with multiple in depth pages containing financial information for 1 stock by utilizing different functions from excel. I will also use the Pratt financial model to perform multiple calculations and forecasting using the data I've collected. After I complete the Pratt model for the stock I will analyze the intrinsic value I've calculated and what it means specifically in regards to the current stock price.
