

Course Title	Basic Cognitive Processes
Course code	24UPSYDSC103
Semester	II
Course Level	100-199
Credit	4
Type of course	Discipline Specific (Major/Minor)
Hours per week	5

If you are driven to understand the unseen forces that shape our actions, or if you're curious about what truly defines us as individuals and societies, this course offers the intellectual rigor and perspective you need. Step into the world of psychology, and prepare to challenge and expand your understanding of the human mind.

The course takes students through critical modules: from the focused lens of Attention and Perception to the intricacies of Cognitive Processes, the driving forces of Motivation and Emotion, and the profound depths of Consciousness. Each topic is designed to give you not only a foundation in psychological science but also a transformative perspective on human experience.

Unlock the mysteries of the mind! Dive into psychology and discover the secrets behind thoughts, emotions, and behaviours. Take this journey to transform how you see the world—through science, curiosity, and a passion for the human experience, exploring the mind's wonders!
