Double Case (DCT) – Corporate Token Whitepaper

Introduction

Double Case is an international company founded on December 6, 2011, specializing in consulting services for global financial markets, free financial education programs, and professional training for traders operating on stock and capital markets.
The company operates 2 offices in Chișinău (Republic of Moldova), 7 offices in Ukraine, and branches in Italy and the United Kingdom.

Double Case is launching the Double Case Token (DCT) on the Solana blockchain to demonstrate how tokenizing corporate capital can provide a fast and efficient alternative to a traditional stock exchange listing. The token serves as a utility instrument within the Double Case ecosystem and promotes the concept of raising capital through tokenization.

Company Overview

Mission: To educate and guide participants in financial markets through courses and consulting services.

Vision: To become the regional leader in applied financial education and a model of integration between traditional finance and blockchain technology.

Core Activities:
International financial consulting, free financial education programs, and professional training for traders.

Company Structure:
Limited Liability Company headquartered in Chișinău, Republic of Moldova.

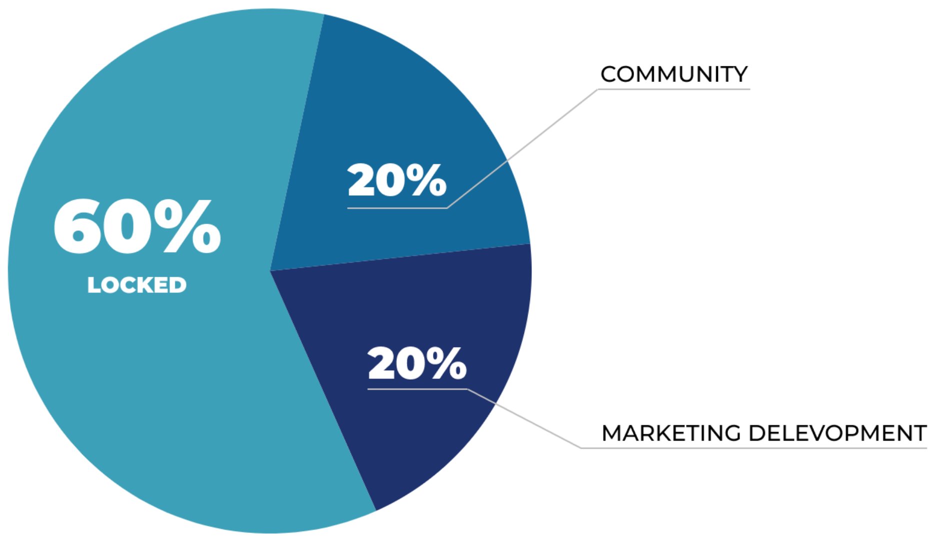
- **Company name:** Double Case SRL
- **Registration date:** December 6, 2011
- **Primary activity:** Financial consulting and financial education
- **Offices:** 2 in Chișinău, 7 in Ukraine, branches in Italy and the United Kingdom

Token Model (Tokenomics)

Double Case Token (DCT) is a token on the Solana network, built according to the SPL standard. The contract has both the mint authority and freeze authority revoked, meaning that no additional tokens can be created and token circulation cannot be frozen. DCT has **6 decimals** and a fixed supply of **1,000,000 tokens** of which 600,000 are locked in for a fixed period of 10 years.

Parameter	Value
Token name	Double Case Token
Symbol	DCT
Network	Solana
Total Supply	1 000 000
Decimals	6
Freeze Authority	revoked
Mint Authority	revoked

Token distribution



Token Utility

The DCT token offers:

- Preferential access to courses
- Discounts on consulting programs and events
- Benefits within affiliate programs
- The ability to participate in certain decisions regarding the expansion of educational programs (limited governance features)

The intrinsic value of the token derives from the success of Double Case as a company and the revenue generated from consulting and educational services. This model resembles the logic behind company IPOs, but utilizes blockchain technology to reduce costs and bureaucracy.

Technology and Infrastructure

The Solana blockchain was chosen due to its speed (over 2,400 transactions per second at a cost of approximately $0.00026 per transaction) and its innovative Proof-of-History and Proof-of-Stake architecture. This infrastructure allows Double Case to manage a corporate token with a large number of users at minimal operational cost.

Legal and Compliance Considerations

Double Case Token is classified as a **Utility Token**. The company complies with KYC/AML regulations and data protection standards. The token does **not** grant shareholder rights and does **not** represent a security. The issuance process is conducted in accordance with the legal frameworks of the countries in which the company operates.

Roadmap

- **Step 1:** Creation and distribution of the token on Solana, publication of the whitepaper
- **Step 2:** Listing DCT on DEX platforms (Jupiter, Raydium) by creating liquidity pools
- **Step 3:** Listing the token on CoinMarketCap and CoinGecko
- **Step 4:** Integrating the token into the Double Case ecosystem (discounts, programs, benefits)
- **Step 5:** Listing the token on major CEX platforms (Binance, Bybit, Huobi, KuCoin, Coinbase, Upbit, OKX, Bitget, Gate, MEXC, BingX)
- **Step 6:** Developing international partnerships with educational and fintech companies

- **Step 7:** Global expansion and promotion of the “Tokenized Business Initiative” program

Team and Advisory Board

Alexandru Ignat — General Director of Double Case. Over 15 years of experience in international financial markets.

Olga Tăbârță — Executive Director, Financial Consultant, and Trader at Double Case.

Advisory Board consists of international legal advisors, financial experts, and blockchain specialists.

Conclusion

Double Case Token represents an innovative step toward the tokenization of corporate capital. The project demonstrates how blockchain technology can provide a modern alternative to traditional fundraising models while maintaining investor transparency and trust.
