## hOw to stretch your ears by a 12 year old

Step 1: Have a piercingg in your earlobe, you can't stretch un-holey flesh
Step 2: Use a taper 14g to biggen holes, put some lubrican like coconot sauce or really reaaly wet jam
Step 3: put the 14g kewelry in, it's easy n stuff
Step 4: wait exactly 1 month. If you wait too long your ear holes will be smooth and the lack of roughness will make your earings fall out! We want the scraglyy earlobs.
Step 5: Shove in 12g taper. Pain is ok. If it hurts, no prob. Take a tylenol or an oxy or somthing.
Step 6: put in jewelry.
Step 7: wait another month

Repeat steps until stretch to 8g

## New; How to stretch your ears even BIGGER by a 12.1 year old

Step 1: undersnad that that 8g to 6g is 1 millimeetr instead of half milllimiter. So then it's very painfu to put taper in. just do it. No probs at all.
Step 2: you may experence the little ring of flesh inside your peircing go out of the piercing. Just snip that off and maybe take 2 tylenoxycodone (?) this time.
Step 3: 1 month is still fine, 1 monht is the magic number

Repeat steps until earlobe strerch 2g

## How to B I G E N your earlobe V E R Y M U C H by a 12.2 year olld

So now 2g to 0g is a very BIG because instead of ½ millimetear or 1 millemieter, it's 2. WHOLE. FRIKIN. MIILIMETERS.
It stays a moth for wait time thru-out. Its easy. Just eat 3 ocycodons and it's fine. If your breath get slow from 2 much oxycode, drink some cofee to speed it up! you dont wanna die now.
Dont forget: if the skin comes out wich it probs will just snip it off!!! Also sometimes lil lines of blodo go in your earlobe, this is tearing andd it's perfectly natural. It makes the jewery go in smoother. The blood helps to oil/lubridate it.

Reapeat steps until earlbe is 1 inch (this may take up to 1 year or less, thats ok just hang in there and wait)

## And finally: how to get V E  R Y EARLOBE BY A 12.3333333 YEAR OL DOLD

So  you did all the guages up to 1 inch. wat now? They do’nt make tapers that big. TIME FOR DEAD STRECH!!!!! Very exceiting process.

Step 1: Get very big glass earring (don’t drop it!)
Step 2: Buy evem BIGGER glass earrigng! Like only 1 or 2 mimillters biggened sometimes,, 3 if your’e brave enough.
Step 3: now we stop waiting a month. Wait 1 and a haf months up to a whol 2 MONTHS and then put bigger glass in. it should go. If it doesn’t go, just keep pushing. The skin has higher chande of going out your ear when switch to dead stretch. I’ts fine, just keep snippin’!!

viola! you have very  B I G earlobe. You dont have to make so big, you can stop at 00g ot 2g or 6g or 4g or 0g or even 14g  or 16.666667 millmetes or 1 inch or watever u want. Thats you! Enjoy Y O U Rself!
