

Corrado Ruscica holds a MSc in Astronomy from University of Bologna with a research thesis in extragalactic radioastronomy. After graduation, he got a scholarship as PhD student at University of Milan in the Doctoral School of Astronomy working on a research project regarding active galactic nuclei in X-ray/radio/optical bands. Main fields of interest are active galaxies, compact stellar objects, primordial Universe, particle physics and the SETI program. He conducts science outreach and writing activities. He also worked as contributor for "Medialnaf", the online journal of the National Astrophysical Institute, and "Il Bo Live", the online journal of the University of Padua. He published three popular e-books for Macro, namely "Idee sull'Universo", "Enigmi Astrofisici" and "L'Universo Infante", and two popular books for Cento Autori, namely "Civiltà Extraterrestri" and "Alla ricerca dell'Universo oscuro". He finally holds a Master degree in Science Journalism and Communication from University of Ferrara.
