

Privacy Policy

Last updated: May 2026

Our promise

CleanVault is built around a simple idea: your data is yours. We never sell, share, or store your personal information on remote servers. Nearly everything happens on your device.

Photos

Duplicate detection, storage analysis, and the Photo Vault all run locally on your iPhone or iPad. Photos you add to the Vault are encrypted with AES-256-GCM using a key stored in the iOS Keychain and never leave the device.

Contacts

Contact deduplication uses the iOS Contacts framework on-device only. We never copy or upload your contacts.

Email Vault

Email addresses, passwords, and notes you save are encrypted on this device using a master password that only you know. We cannot recover this password.

File Vault

Documents, PDFs, and other files you import are encrypted with AES-256-GCM on this device. The key lives in the iOS Keychain and files never leave your device.

Wallpapers

Wallpapers are drawn entirely on your device using built-in graphics. No internet connection or external service is used, and no data leaves your phone or tablet when browsing or saving wallpapers.

Permissions

We request access to Photos (for cleanup, Vault, and saving wallpapers), Contacts (for merging), and Face ID / Touch ID (to unlock the Vault). You can revoke any permission at any time in iOS Settings.

Children

CleanVault is not directed at children under 13. We do not knowingly collect any data from children.

Subscription

CleanVault offers a 30-minute free trial. After the trial, a \$4.99/month auto-renewing subscription is required to keep using the app. Subscriptions automatically renew unless canceled at least 24 hours before the end of the current period. Payment is charged to your Apple ID upon confirmation. You can manage or cancel any time in your Apple ID account settings.
