

Name: Harshit Kedia

Personality: INTP, 4wing5

Birth: XX February 2000

Residence: Varanasi, Uttar Pradesh, India

Career: currently pursuing data science and LLM development, will get into more computer science subjects after mastering data science. I want my job to be work from home.

Some centerpoints of my life:

1. Earning enough money to secure my finances for household needs, through job/business/freelance in technology
2. Maintain fit and disease free body (mostly through healthy food, yoga and good routine, and all this by learning about human body from ayurvedic, yoga and modern medical knowledge)
3. Building a strong family and network of friends
4. Building character to live in harmony with people and for relaxed mind and good mood by developing the right understanding (by listening and adopting the right philosophy)
5. The curiosity to understand everything, regardless of getting direct monetary benefit (preference wise, science, psychology, finance, economics, business, politics, archeology, etc, or science > commerce > humanities 😊)

Looking for people to complement me in my journey.

I am a very, very simple person. What I don't like: traveling to far away places, be it for religious or recreational purposes (just for fulfilling the quota and for showing others that we also went), expensive and uncomfortable clothes, expensive gadgets like iphone or mac for boasting, makeup and cosmetics, jewelry, eating in expensive restaurants or buying branded items for showing class, wasting time and money going to DJs, clubs or watching movies in theaters or WATCHING other people playing cricket, be it in stadium or on TV, unnecessary shopping for overloading home with unnecessary items, be it offline or online shopping, ... The list can go on. Overall, I am very calculative and stingy of spending my time and money and want to do anything new only if I feel that it will have some positive impact on my life, after having proper understanding and research on it, because I feel that materialistic things have no limit, so I want to have a spiritual approach to life (spiritual and religious are completely different, spiritual related to self enquiry, spiritual word originating from spirit).

I love intellectual and deep conversations, and my interests include science, especially theoretical physics, theory of everything, astrophysics and cosmology, quantum mechanics, relativity, string theory, loop quantum gravity, philosophy, origin of life, rationality, critical thinking, philosophy, hard problem of consciousness and awareness, origin of life, spirituality (not religion, I'm agnostic atheist), minimalism, fitness, ayurveda, humanism, veganism,

vegetarianism, feminism, artificial intelligence - generative AI, LLMs (large language models), bitcoin, nostr, libertarianism, conspiracies, finance, economics, technology, computer science, etc.

Some youtube channels and personalities i follow for my interests: Stephen Hawking, Carl Sagan, Brian Greene, Sean Carroll, Richard Feynman, Brian Cox, Candid Exchange, Arpit Dwivedi (arpit explains), Vimoh, Fit Tuber, Psych2go, seeken jigya, tal ben-shahar (happiness), Sandeep Maheshwari, richard dawkins, MahiNergy, Nitish Rajput, Aditya Saini, James Corbett (Corbett report), Yohan Tengra, Krish Naik, Hitesh Choudhary, code with Harry, dswithbappy, fireship, 1littlecoder, History of the Universe, quanta magazine, crashcourse, Freecodecamp, FloatHeadPhysics, Arvin Ash, World Science Festival, looking glass universe, Physics explained, Branch education, PBS space time, Cleo Abram, manvir singh, astro kshitij, David Chalmers, Sabine Hossenfelder, bitcoin university (matthew kratter), Efrat fenigson, titus gebel (free private cities and free cities foundation), pump nation, big think, closer to truth, up and atom, etc.

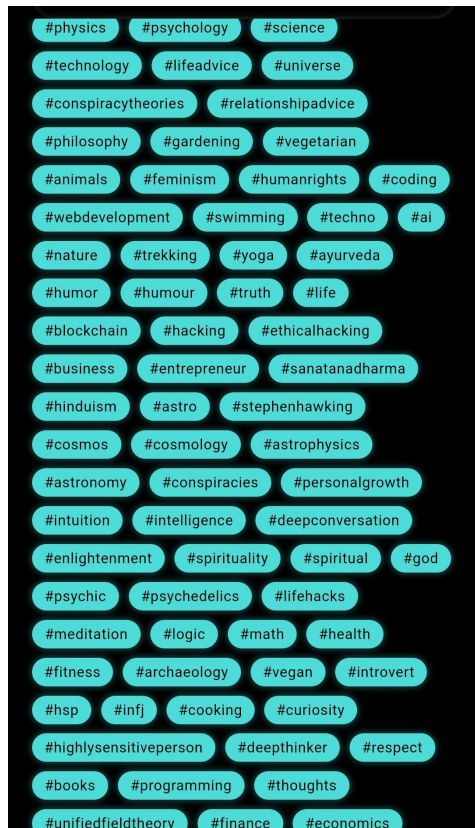

Some questions about myself:

1. My life philosophy is:
 - A. Simple life with extraordinary thinking
2. I'm crazy for:
 - A. Having curiosity to understand everything (specially science [astrophysics, cosmology 🤖], philosophy and spirituality) around me, regardless of getting a monetary benefit.
3. Tell me about:
 - A. Some long term goals of your life, what you want your life to be in the next 10 years.
Maybe we can start our conversation with this topic, if you want to initiate 😊
