

Check Point Professor's Frozen 30 Second Speedrun Contest!

Announcement

It's heating up for CPP's first Summer in Texas. To help him cool off, he NEEDS YOU to make him some Cool Speedrun Levels in the Night Snow Theme!!

The theme?

"Ice Cold SpeedRun"

Rules

1. Make a Super Mario Maker 2 with the theme of **"Ice Cold Speed Run"** Create a level using the Night SNOW Theme and make it a speed run level that is around 30 seconds to clear. Use your creativity and make it fun!

2. Each Level will be played live on a special dedicated stream for **15 Minutes**, after that time is up I will judge and score the level/game based on the criteria listed below. (I will give some critique live, but the actual scores will not be public).
3. Keep it family friendly. I am a family friendly steamer after all.
4. **No old levels**, all levels/games must be created for this competition.
5. All submissions will be made to Check Point Professor's Discord at the following link under the CONTEST LEVEL CODES Thread <https://discord.gg/cbNpUdH>
6. All submissions must be made by 11:59PM **June 9th 2024 CST** to be accepted into the competition.
7. All submissions should carry the hashtag **#CheckPointProfessor, #CPP or an obvious variation** in the title or description of the level.
8. **Levels that do not follow the above rules will be disqualified from being played and showcased live on stream.**

Kindly keep in mind that I will only have 15 minutes to play your level/Game, the harder your level, the more difficult for me to see your level/game in its entirety and this may affect your final score

Scoring Criteria

Below is the scoring criteria outline for this contest, please read through this so you are aware of how I will be judging your levels. To get a higher score, you must follow the criteria as much as possible. Each Criteria will be scored out of 5 (Half Points included), so a max score would be 25/25.

Enjoyment - Is the level enjoyable to play? Did the player like the flow of the level?

Readability & Timing - The player has clear goals and knows how to achieve them? Can you get through the level without any confusion? Does the level utilize the timer in a correct way?

Originality - It is nice to see something new, is the level creative? Or has the level used old techniques but shown in a new way?

Appearance - How beautifully decorated is your level? Has there been an attempt to make the level aesthetically pleasing? Does the level visually flow well throughout?

Creative use of Theme: How well did you follow the theme of the contest.

Prizes

Shout outs and Glory!

Winners will also receive a special shout out in a winners' highlight video!

My schedule will be posted here, discord, twitter, and on YouTube.
