1. INTRODUCTION (Font Size 12, Cambria, Bold, Uppercase)

Write the body text in Cambria, Font size: 12. State the objectives of your work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Explicitly state the state of the art, gap in the literature and theoretical contribution that signifies the significance of your research. Upon receipt of paper submission, the Editor sends an e-mail of confirmation to the corresponding author within two or four weeks. If you fail to receive this confirmation, your submission/email may be missed. No submission charge should be paid at this stage. We use double-blind system for peer-review; both reviewers and authors' identities remain anonymous. The paper will be peer-reviewed by two experts.

Transling Journal uses APA 7th referencing style. These are the examples of the citation on the body text: (Prensky, 2001), (Öztürk & Gürbüz, 2017), (Suryanto, 2014), (por, 2012), (Yusuf & Wekke, 2015), (Silverman, 1991), (Dijk, 2008), (Wodak & Meyer, 2001), (Sumarlam, 2016)(Fauzan, 2015), (Hasbi, 2013), (Fairclough, 1993), (Meyer et al., 2015), (Perry, 1999), (Studies, 2018), (Culpeper, 2016), (Haugh et al., 2013), (Kádár & Haugh, 2013). INTRODUCTION to CONCLUSION should be 4.000 – 6000 words or at least 18 or 19 pages. The minimum requirement of amount of references is between 25-50 references and 40-80 % taken from reputable International journals.

2. METHOD (Font Size 12, Cambria, Bold, Uppercase)

This section explains the rationale for the application of specific approaches, methods, procedures, or techniques used to identify, select, and analyze information applied to understand the research problem/project, thereby allowing the readers to critically evaluate your project's/study's overall validity and reliability.

3. FINDING AND DISCUSSION (Font Size 12, Cambria, Bold, Uppercase)

The discussion is written to interpret and describe the significance of your findings in light of what was already known about the issues being investigated, and to explain any new understanding or insights about the problem after you have taken the findings into consideration. It should connect to the introduction by way of the research questions or hypotheses you posed and the literature you reviewed, but it does not simply repeat or rearrange the introduction; this section should always explain how your study has moved the reader's understanding of the research problem forward from where you left them at the end of the introduction.

The research findings in the form of research data are further discussed or critically interpreted with a particular relevant theoretical approach. Data can also be supported with the presentation of tables, images, etc. Captions for the table are written above it with sequenced numbering so that it can be easily referred to, though not put under the pointing sentence/ paragraph. The line (border) to the table is made minimalist by eliminating the vertical lines and leaving horizontal lines deemed necessary. Captions for images are placed below the picture, also providing sequenced numbering. One page only accommodates a table or an image with a maximum of two-thirds the size of the page (size adjusted as efficiently as possible).

Table 1. Article Writing Systematic Compliance Form

No	Article Writing Systematic	Compliance
1	Introduction	Too wordy, less relevant
2	Methodology	Less elaborated / weak
3	Discussion	Interpretation is less critical
4	Conclusion	Repeating the findings and discussion
Editor's Decision		To be Revised / Declined

4. CONCLUSION

The conclusion is intended to answer the research problems or purposes. It helps the readers understand why your research should matter to them after they have finished reading the paper. It is not just a summary of the main topics covered or a re-statement of your research problem, but a synthesis of key points and, if applicable, where you recommend new areas for future research.

Transling Journal uses **APA 7th referencing style**. The references should be in alphabetical order; use Cambria (12), 1-spaced. **The minimum requirement of amount of references is between 25-50 references and 40-80 % taken from reputable International journals.** It is preferable to have academic journal as the references published in the last 5-10 years except for main references of particular theories. It is suggested to apply reference software like **Mendeley, Zotero** or **Endnote**.
