

XP Kibble Classic

SPAWN CODES

There may come a time when you need to spawn in some XP Kibble for one reason or another. Maybe the game bugged out and caused you to lose some after you worked so diligently to craft it and you figure it's only right to get it back free of charge. Or maybe you just like avoiding the work altogether?

Regardless of your reasons, you'll find the spawn codes you need below to spawn in 1 of each flavor of XP Kibble. Simply change the "1" near the end of each command to whatever number of XP Kibble you'd like to spawn. These codes are really just commands that you need to execute on the Ark Console (press TAB on PC).
