

“Good evening Canton! America must build again if it wants to bring about a new golden age and that starts in cities like Canton. Canton was one of the cities that rose from nothing to prominence during the Industrial Revolution, being crucial for our nation. Then the jobs left. Now many say what the future holds. I offer you a new future. As President I will incorporate Canton into a brand new industrial opportunity zone, paired with new advanced manufacturing tax credits and creation of a right to build we will begin to bring good factory jobs back to a city like Canton. Most importantly Canton will be key in bringing back MADE IN AMERICA! For workers here who are losing their jobs to ai as President I will create a national jobs training program to support you folks in finding new work, this will also apply to our great veterans. Here in Canton we need to help newly wedded partners which is why as President I will create a marriage tax credit to reward newly married couples. I will expand the child tax credit to support working families. I will create a rebate on the value added tax because no American should have trouble paying for groceries. Together folks we can bring back manufacturing in our great country and restore Canton’s status as a great American city. Thank you Canton! God bless you and good night!”
