Director Haspel,

I apologize for the nontraditional method of contact, but this has gone on far too long, I am not sure how much bigger of a deal I can make of it, thank you though for opening and reading. I promise all links are true to the best of my knowledge when I made them and that none of them link to any kind of dangerous software, mostly Google searches, their online Documents site, YouTube, Wikipedia, and some of my images hosted on public sites, the same way I did for all of this, learning as I went, using all the easter eggs I have ever learned to do all I could to make sure that this even was remembered. All of my life, I have believed that "the system", the interconnected web of life, was real, that if given the chance, the policies, laws and traditions put in place, for when they were needed, would indeed kick in and work as intended. Nearly since I cast my vote in California in 2016 for the current POTUS, I have been in some amount of great fear that normality was not quite the case any longer. Much like the tale of Hansel and Gretel

I was sanely able, all around the current version of ARPANET
<<https://en.wikipedia.org/wiki/ARPANET>>, the world wide web, just in case I
needed to get back there later, I hope it is a very good guide, for you.
It is Veterans Day today, and My 97 year old Uncle passed away a few months
ago, he is pictured below. The only made up part of my story, is that, I
think, that when the new recruits arrived on Magnetic Island in 1943, in an
attempt to get them into the mood of the Second World wide War, they "Let
the new soldier fire the big gun". My Uncle was an aircraft mechanic
<blob:<https://imgur.com/12e0032a-29c1-409b-ad4d-a3dc480a8513>>, not always
the most traditional vision of a warrior <<https://i.imgur.com/qdMfZBM.jpg>>,
but to be sure, a necessary, and an effective force of, one. He would
later become an electrician, building and maintaining parts of that
networked system in his home, the Bay Area for over 60 more years, the
remainder of his days. Though old and worn and awfully faded, he probably
showed the photo to many people, at some point in its existence. NONE of
his children, grand, or great grandchildren though, nor any other, newer
nor surviving, long term family members I have shown that photo to, has
ever seen it before, his kids didn't even think it was him at first. It
was in an album his mother had made for him, from the 25+ years from before
he met his wife, my Dad's sister. Though I am sure he was not ashamed of
the photo or his service to his country, you can see on his face, at the
time, he was stoked. I think, it was simply a different part and time of
his life, plus his newly acquired boot camp training, that made him look so
very happy. I am sure, there were many things he probably would rather
have not done, or seen, but felt it was his duty, and that, became his
life. It has really hit home now to me, 45 years into my own life and
family, just how much value the world loses, when our present turns into
the past and has a chance to disappear forever. I assure you, it is not
lost upon myself, just what some people would consider, what I have done
here. I would not choose that word. I choose "Reason".

In addition, I have been posting important points of my information,
spreading it as best I can, to the news media, to private and public email
addresses of private and public people who work in the government, business
world and judicial system, and then eventually posted the much of the news
to accounts <<https://i.imgur.com/Hqwtp94.png>> full of people
<<https://i.imgur.com/zXmg8gP.png>> specifically selected, as those I most
thought might listen, in as many languages as possible
<[https://docs.google.com/spreadsheets/d/1wq_ktBYW_-jS1nkZh-W0unt06-f0nW6mmY=
Z3tfQaWiI/edit?usp=3Dsharing](https://docs.google.com/spreadsheets/d/1wq_ktBYW_-jS1nkZh-W0unt06-f0nW6mmY=Z3tfQaWiI/edit?usp=3Dsharing)>.

Some people have, some did not. No single individual is an issue for me
though, as I have tried to remain only friendly on these accounts the
entire time, not that I often make many waves, and I luckily don't get too
angry very often. I just needed to keep a record of all of this somehow.
It was too big to contain inside my head. Too messy for paper. I needed

an archive. AlxBert2@gmail.com & 7077262421 are the login names and identifiers I have mostly used, though I have sent a few emails as anonymously as I possibly could, and to every corner of the internet as well, there are many ways possible, including AlXbert@gmx.us(not a United States only domain name, but which ones are.). I did my best to keep most all of the information similar or the same and, I ultimately shared with Mr Zuckerberg, in order to get my account back after Facebook froze access to it, and now, to you. Here is a screenshot of the mail I sent to Mark Zuckerberg <<https://i.imgur.com/mdtweOV.png>>, via his otherwise unlisted gmail account(hi everybody), much like yourself, and anyone else I thought may be willing to listen

<<https://docs.google.com/document/d/1hAdYFzgiJe-hukjPuqxlzqv5cBnd0Gzax10ZUJ=FnFM4/edit?usp=3Dsharing>>

with updated information sent out as things developed and occurred, and as time went on. I also made a video, one that was just meant to REALLY get the attention of, and to make, the Republican Candidate for President <<https://www.youtube.com/watch?v=3DpVxz20LVuII>> in 2020, really quite very mad I am sure, and I think it worked. Too well. I did not intend to get an honorable <<https://www.dhs.gov/person/kevin-k-mcaleenan>>, career driven <<https://www.pbs.org/newshour/politics/who-is-kevin-mcaleenan-acting-head-of-homeland-security>>,

honest life long serving military man

<<https://www.congress.gov/115/chrg/CHRG-115shrg33483/CHRG-115shrg33483.htm>> fired/"resigned"

<<https://www.nytimes.com/2019/10/11/us/politics/kevin-mcaleenan-homeland-security.html>>.

I also believe I may have had a hand in Director McAleenan testifying, via a self orchestrated number of tweets, the night before his testimony. Though twitter deleted most of the ones I sent to him, before I had the chance to screenshot it. The only "threat" I made was that I would testify in his stead. I had no real way of doing that.

I take full responsibility for anything that may be considered a crime, though I really did try and to be very careful, to tread the line whereas if I did it correctly, I would not ruin my family, friendships, my wife's chances, by for example, not submitting any of my emails to any government addresses labeled as "for emergencies only". My Dad was a police officer, my Mom a lifelong nurse, and as a former CalFire-fighter, and licensed EMT, I very much have respect for emergencies, and procedure. This I have always considered an emergent paperwork situation. Not an emergency. I have my own beliefs as to what is going on in this country right now, as does my wife, that is NOT any of the point of this for now. It will be resolved with time. I am for now, contacting YOU, in hopes that you might have some advice, or some influence in this situation. It seems I am not to otherwise receive an answer to my last query to the FEC eFile support department, by phone, at noon, the day of the good Directors sudden and surprise resignation. "me:Why did you (the FEC tech) ask me for my committee's online password yesterday? Even though it was a password issue,

that is just a horrible security practice.

<<https://www.consumidor.ftc.gov/articulos/0009-computer-security#passwords>>

Can I get a call back from your supervisor, you probably see them everyday, right? her:Speaking of security, you do realize all calls are logged?

me:Yes, I do, and.. Good!". This is my first election campaign, I had a lot of questions, the FEC purports to offer assistance to candidates. I have gotten some very good people on the line there, and otherwise had all of my questions answered.

Finally, I have started sending out my draft of a paper

<<https://docs.google.com/document/d/1xMTyYaVHU2crhnapSf3TMPqGkuBWRQpVoskqLZ=rir58/edit?usp=3Dsharing>>

I am planning on publishing within the Quantum Computing

<https://en.wikipedia.org/wiki/Quantum_computing> scientific community as soon when it is finished, it does mention some of this event, which inspired me to write it, within its pages, with some, but not full context. I have sent it out to much of the QC community privately already, but this is the first time a government official will have seen it as far as I am aware. Quite the honor for me for it to be you.

Additionally, MI6 contacted me a few days after McAleenan testified, asking me why I had earlier, used their specific email address I had found, to contact them. My main answer is, I found them on a Google search, like anyone else, though I did give them another. Again, thank you for reading <<https://i.imgur.com/33aI1lf.gif>>, and For Your Service, on this day of remembrance from, and for, all of those who do, and have served, All of US, in these United States of America.

I can forward anything to you that you would like, if you would like. Though, I just re-read the MI6 email, and I am not supposed to share the contents of it with anyone without permission from them. I am sure you can get that from them though, you have MY permission. Thank you. I hope I can, and promise I will to the best of my ability, never forget our country, the way I keep it in my head and in my heart. Please be aware also, that I have sent this information similarly to the entire cast of Saturday Night Live today, so... I guess time is somewhat, of the essence. Again, sorry for the timing, I just thought to send this to you after reading about the duties of your position on the CIA kids activity page <<https://www.cia.gov/kids-page/games/index.html>> for our 5 year old, great idea, but I think she is a little young yet. It's a very Small World though, and I hope this gets you a good start on your own information gathering techniques. I am sure they will top mine..

P.S. Please tell MI6, I am very sorry for one of my emails, as I did not know that enigma does not encode anything but letters until right...., NOW.
