Our main HUD for Spin&Go - SpinCoin

 Описание SpinCoin на русском языке

 Description of SpinCoin. English version

You can pay by installment for a lifetime purchase, ask about conditions in Skype

Discount on subscription Hand2Note to 33%! Details in the skype - petan2002

Reviews (Russian prevails) can be read or left here: http://www.gipsyteam.ru/profile/petan

I would like to draw your attention to the new HUD for the poker tracker Hand2Note. **SmartGo Hud** is designed to play in Spin&Go tournaments on Pokerstars and their counterparts in other poker rooms, as well as for the play HU SnG. Hud is made in the style of Hud for PokerTracker4 from pokerschool SmartSpin.

SmartGo Hud independently switches from 3way to HU depending on the number of players at the table, without using additional software.

All the stats in the hud have standard popups with detailed blocks for sizings and ranges that can be used both during the game (through the hud) and after the game in analysis (via popups). Also in **SmartGo Hud** there are additional popups, they are attached to cells with an character asterisk at the end of the name - *.

Due to the capabilities of Hand2Note, the hud is made in accordance with the principle of positioning, i.e. some of its spreadsheets are displayed to opponents, depending on your and their positions in the current hand. Also, the coloring of the spreadsheets of the hud is applied depending on the position. Based on the standard colors of the positions from the tracker Hand2Note.

For most effective HUD work, it is highly recommended to use additional programs that can transfer stack sizes, current hand history, etc. data to Hand2Note. Depends on room you play it can be StarsHelper, SessionLord, 888Caption, iPokerTools and so on. The list of supported programs you can find on Hand2Note website. Using of these programms allows HUD to obtain information dynamically (while playing) about the current players stacks, it shows HUD straight from the first hand (not from the second like PokerTracker, Holdem Manager and other trackers), allows to track the history of the current hand.

SmartGo Hud automatically highlights stats for current effective stacks (in 3way simply outputting the stats in bold, and in HU uses a combination of highlighting, frame and bold).

Hud allows to display graphical charts (heat maps) for all statistics. On PokerStars this function is implemented in text form, in accordance with the rules of this room. Functional diagram output works in popups for all rooms without exceptions, which additionally allows to make an intuitive analysis of gaming sessions.

All stats in the hud have color ranges depending on aggression - green is more tight, gray is normal, reds are more aggressive. The config contains two versions of the hud with a bright and quiet coloring of stat ranges.

Explanation of abbreviations stats for SmartGo Hud

General statistics

Table of the hud

■ - Container of notes to the opponent. If there is a number inside the container, it indicates the number of hands with showdowns in the last session. The small white rectangle in the bottom left corner indicates the presence of saved notes on the hand with the opponent's participation. You can create different colors for your opponent's tags and use them in the game. To change the color of the container of notes you need to click on it. By default, Hand2Note has two colors - Red for regs, Green for fishes.

NickName - Opponent's nickname. Unfortunately, in Hand2Note you can not insert a shortened nickname, so if stretching a table with long nicknames is annoying, you can delete it in the HUD Editor.

R Act * - The cell to which a popup is bound with actions of an opponent on the River - Won at ShowDown and Bluff Bet. *See the description of the attached popup.*

1.5k HU - Number of hands in HU (**k** - multiplier x1000)

3.5k 3w - Number of hands in 3 way

5k - Total hands in 3 way and HU

Bet Size – The average size of the Bet action on streets as a percentage of pot size

Attached to the cell popup

WSD – Won At ShowDown tells what percent of showdowns a player wins out of all those that he sees.

WSD after River CALL - percent of showdowns a player wins out of all those that he sees after he call on the River. **Total** - total and divided by size of pot on the River.

WSD after River BET - percent of showdowns a player wins out of all those that he sees after he bet on the River. **Total** - total and divided by the size of pot on the River.

In Position - In Position.

Out of Position - Out of Position.

Call or Bet were the last actions of the opponent on the River!

The bottom table shows how often the opponent changed his hands into a bluff and bet on the River.

In Position - In Position.

Out of Position - Out of Position.

AFTER BET T - After bet on Turn.

AFTER CHECK T - After check on Turn.

AFTER CALL T - After call on Turn.

The first blue number **BLUFF BET (with weak pair or lower)**.

The second blue number indicates **ALL BETS (with showdown)**.

Preflop SB HU

	Table of the hud	
		H – Hands count **VP** – VPIP Voluntarily put money into the pot **MR** – Open Min-Raise (open raise with size from 2 bb to 2,2 bb) **Fv3B** – Fold to 3–bet not shove (SB open raise, BB raise nAI, SB fold) **v3S** – Fold to 3–bet shove (SB open raise, BB raise AI, SB fold) **R** – Open Raise with size more than 2,2 bb but not shove **L** – Open Limp **LR** – Raise to isolate (shove and not shove) (SB limp, BB raise nAI, SB raise) **LF** – Fold to isolate not shove (SB limp, BB raise nAI, SB fold) **vAI** – Fold to isolate shove (SB limp, BB raise AI, SB fold) **OS** – Open Shove

HUD table (SB):

SB	H	VP	MR	Fv3B	v3S	R	L	LR	LF	vAI	OS
13bb+	459	91	46	56	50	0	43	11	81	87	1.7
25+	42	98	64	33	50	0	33	0	99	--	0
20-25	115	89	50	50	99	0	37	7.7	85	99	0.9
16-20	171	91	42	75	82	0	47	13	73	86	1.8
13-16	131	91	41	--	80	0	47	14	86	82	3.1
10-13	156	87	14	92		0	49	27	60	77	24
07-10	133	88	5.3	--		0	33	0	80		50
00-07	78	81	0	--		0	15	0	99		65

Preflop BB HU

	Table of the hud	
		H – The number of hands played against a raise from SB (limps and shoves from SB excluded) **FvMR** – Fold against Min-Raise (2-2,2 bb) (SB minraise, BB fold) **3na** – 3–bet not shove, excluded the situation when a 3–bet is shove (SB raise nAI, BB raise nAI) **3S** – 3–bet shove, only the situation when a 3–bet is shove (SB raise nAI, BB raise AI) **H** – The number of hands played against a limp from SB (raises and shoves from SB excluded) **IS** – Isolate not shove (SB limp, BB raise nAI) **ISS** – Isolate shove (SB limp, BB raise AI) **IS/F** – Fold to raise isolate (not shove and shove) (SB limp, BB raise nAI, SB raise, BB fold) **IS** – The *average* size of Isolate not shove

HUD table (BB):

BB	H	FvMR	3na	3S	H	IS	ISS	IS/F	IS
13bb+	150	26	3.3	20	243	16	24	67	2.8
25+	20	15	5	10	15	20	13	--	3.3
20-25	65	29	4.6	22	56	25	25	99	2.8
16-20	45	24	2.2	24	88	6.8	23	--	2.9
13-16	20	30	0	15	84	18	26	50	2.8
10-13	10	20		10	103	4.9	41	99	2.6
07-10	1	99		0	52		37	--	
00-07	0	--		--	4		99	--

Disabled Features

In hud, you can display stacks of opponents recounted into big blinds (bb), as well as an effective stack in current hand. By default, their output is disabled. You can turn on the display at any time. If you need this functionality - contact hud support - **skype - petan2002**

Main popup

The main popup is called by clicking **NOT** on a stat (by free, empty place) in any table of the hud or by clicking on the player in the list of players in the main Hand2Note window. When you call the main popup from the list of players in the main Hand2Note window, all preflop and postflop color maps work in it, even in the Pokerstars rooms.

Part of Main popup *Common stats*	**AFq**– Aggression frequency (factor) by streets (**Flop**, **Turn**, **River**) Attention* **Bet Size** – The average size of the Bet action in the streets as a percentage of the pot size **Total** – Sum of HU and 3way **3way** – Only 3way **HU** – Only HU **WTSD** – Went To ShowDown tells what percent of cases a player saw flop and went to showdown **WWSF** – Won When Saw Flop **WASD** – Won At ShowDown tells what percent of showdowns a player wins out of all those that he sees	

* – If you use this statistics for opponent's actions analysis in PokerTracker4, keep in mind, that PT4 displays it incorrect. AFq – is the ratio of raise or bet cases on street to the number of situations when a player saw this street. PT4 correctly counts raises and bets, but incorrectly counts cases when a player saw street, not taking into stat lots of situations. Hand2Note (H2N) shows both situations correctly. That is why the meaning of this statistics in PT4 is much higher than in H2N.

Part of table HU preflop BB	**HvS** – the number of hands played against a shove from SB (limps and raises not shove from SB excluded)
	COS – Call Open Shove (SB shove, BB call)

Part of Main popup bottom right corner	The cell shows the current version of the hud installed on your computer

Updates

Updates are free. The current version of the hud is indicated at the beginning of this document. The current version of the installed on your computer hud you can find by calling in any way the main popup (most easily by double clicking on any player in the list of players in the main window Hand2Note). Looking for the "Main" tab, the bottom right corner:

If the versions are different, then to update the hud, you need to contact the support by **skype - petan2002**

List of changes

ver. 2.1.0. - In the main popup, HU BB preflop tables are added columns with the number of Hands played against the Shove (HvS) and the stats Call Open Shoves (COS).

ver. 2.1.1. - In the spreadsheet for the 3way postflop of the Button, the color of the block names is changed to the corresponding (more correct) common color scheme.

ver. 2.1.2. - In the popup table for 3way preflop BBvSB added a column with the Call Open Shoves (COS).
