Abstract (Cambria 10, Bold)

This is the author guidelines and article template of English Education Journal. Article should be started by title of article followed by Authors Name and Affiliation Address. The article must be written in English. Special for the abstract section, single spacing should be used between lines in this text with a font size of 10 pt. The abstract should be typed as concise as possible and should be composed of problem statement, method, scientific finding result, and brief conclusion. The abstract should only be typed in one paragraph with number of words 100-250.

Keywords: keywords contain three to five words/phrases separated by coma and arranged in alphabetical order.

Abstrak (Cambria 10, Bold)

This section comprises the Indonesian translation of Abstract above.

Kata kunci:

1. INTRODUCTION

The English Education Journal (<https://www.ejournal.lppmunidayan.ac.id/index.php/english>) is an open journal that provides sources of scientific information addressed to researchers, research institutions, government agencies, and stakeholders. The journal receives manuscripts or articles in the field of English education, linguistics and cultural studies from domestic and international researchers. The English Education Journal (E2J) is published

by English Education Department, Faculty of Teacher Training and Education, Universitas Dayanu Ikhsanuddin, and it is published twice a year, May and November.

The articles published in the English Education Journal are articles that have gone through a peer-review process. This journal only accepts articles originating from original research results which have never been published (top priority), and new scientific review articles (not priority). The decision whether to accept or not is the right of the Editor based on recommendations from peer-reviewers.

1.1. Writing the Title, Name and Address of the Author

The title of the article is written in English, the author's name (without an academic degree), and the author's affiliation address are centered on the first page below the article title. The line spacing between the title and the author's name is 2, while line spacing between the author's affiliation address and the abstract title is 1. Keywords must be written below the abstract text, arranged in alphabetical order and separated by commas consisting of 3-5 words. If the author is more than one, write down the names of the authors separated by commas (,). In writing names it should not be abbreviated. If the author's name consists of only one word, write the real name in one word, but in the online version (HTML) it will be written in two words that contain the same name (repetitively) for metadata indexation purposes.

1.2. General Guidelines for Manuscript Writing

Manuscripts that meet the English Education Journal (E2J) guidelines (in MS Word format, use this article template) must be submitted in one of the following ways:

1. Submission of the manuscript with the Online Submission System in the English Education Journal (E2J) Journal (<https://www.ejournal.lppmundayan.ac.id/index.php/english>) after registering as an

Author and/or Reviewer by clicking "Register".

2. If the Online Submission System is in problem, the manuscript can be sent via E2J e-mail address: pendidikanbahasainggris@unidayan.ac.id

Manuscripts that do not follow the E2J guidelines will be returned to the author first before continuing the review process.

The manuscripts must contain the following components of scientific articles (section titles in order), namely: (a) Article Title, (b) Author's Name (without title), (c) Author's Affiliation Address, (d) Abstract, (e) Introduction, (f) Methods, (g) Results and Discussion, (h) Conclusions, (i) Acknowledgments, and (j) References.

The writing of the section title in the article content section (Introduction, Methods, Results and Discussion, and Conclusion) must be numbered in sequential Arabic numeric format starting with number one (1, 2, 3, etc.). The title of the first level section is written in bold with the *Title Case* format and arranged in left aligned text without underline. The second level section headings are in bold with the *Sentence Case* format, arranged left aligned text, and use the level two numbering format (1.1, 1.2, 1.3, etc.).

The manuscript must be written in English around 6-15 pages including the cover, tables, figures and appendixes. The manuscripts must be written according to this template in print-ready form. Articles must be written with A4 writing size (210 x 297 mm) and with a format of 25 mm left margin, 20 mm right margin, 20 mm bottom margin, and 25 mm top margin. The manuscript must be written in Cambria font with a size of 11pt (except the title of the article), line spacing 1, and in two-column format. The distance between columns is 10 mm.

Foreign words or terms use italics (*italics*). New paragraphs start 5 mm from the left border, while between paragraphs there are no spaces, except for new headings/subheadings (line spacing 2). All numbers are written in Arabic numbers (1, 2, 3, etc.), except at the beginning of the sentence.

1.3. Specific Guidelines for Writing Content of Manuscripts

Article Title: Article title must be written briefly and clearly, and must indicate precisely the problem to be raised, not giving opportunities for diverse interpretations, written entirely in capital letters symmetrically. Article titles may not contain abbreviations which are not commonly used. State the main ideas of the article first, then followed by other explanations.

Introduction: The introduction must contain (sequentially) general background, previous literature studies (*state of the art*) as a basis for the statement of scientific renewal of the article, statement of scientific renewal, and research problems or hypotheses. At the end of the introduction, the objectives of the article should be written. In this article format it is not permissible to have review of the literature as a heading like in the research report, but it is included in introduction as a previous literature review (*state of the art*) to show the scientific novelty of the article.

Methods: The methods used in completing the study are written in this section including methods of analysis.

Results and Discussion: Results and Discussion contain the results of research findings and their scientific discussion. Write scientific findings obtained from the results of

research that has been done but it must be supported by adequate data. These scientific findings must be explained scientifically.

2. ARTICLE INSTRUMENTS

2.1. Tables and Figures

To enter a "table", "figure", or "equation", please paste the data listed below.

1) Table

The title of the table is placed just above the table, left aligned text, using the Cambria 10pt font. The words 'table' and 'number' are written in bold, while the title of the table is written normally (sentence case). Number the title of the table using Arabic numbering (1, 2, 3, etc.). The table is placed in the center of the page. The text in the table uses font Cambria 9pt with space 1. Inclusion of sources or information is placed at the bottom of the table, left aligned, italics, written using the Cambria 10pt font. In case of the table made is too big and it does not fit the space given, it can be saved as an image to maintain the quality.

Table 1. Foreign Tourist Visits in Indonesia

Year	Number (in million people)	Growth (Percentage)
2014	9.43	7.15
2015	10.23	8.48
2016	11.52	12.6
2017	14.04	21.87
2018	15.81	12.6

Source: Central Bureau of Statistics, Republic of Indonesia, 2019

2) Image

Images must be in high resolution (≥ 300 dpi) in .tiff, .jpg, or .jpeg format. We cannot accept images in low quality. The image title is placed right below the image, centered, using the font Cambria 10pt. The words 'figure' and 'number' are written in bold, while the title of the picture is written normally (sentence case). Number the title of the image using Arabic numbering (1, 2, 3, etc.). Inclusion of

sources or information is placed right after the title, in brackets.

Figure 1. Lake Sentani (Bappeda Jayapura Regency, 2008)

3) Equation

Equations must be done sequentially in the text. Equation numbers must be placed between parentheses and right aligned. Equations must be referred to as Equations (X) in the text where X is the equation number. In a multiple-line equation, numbers must be written on the last line.

$$MIT_i = A_i = 1 - \frac{|(X_{it} - X_{i,t-n}) - (M_{it} - M_{i,t-n})|}{|X_{it} - X_{i,t-n}| + |M_{it} - M_{i,t-n}|}, \quad (1)$$

Each equation is written in the middle of the column and numbered in parentheses and placed at the end of the right margin. Equations must be written using Equation Editor in MS Word or Open Office.

3. CONCLUSION

The conclusions describe the answers to the hypotheses and/or research objectives or scientific findings obtained. Conclusions do not contain a repeat of the results and discussion, but rather a summary of the findings as expected in the objectives or hypotheses. If necessary, at the end of the conclusion it can also be added with things that will be done related to further ideas from the research.

ACKNOWLEDGEMENTS

Acknowledgments are especially addressed to research funders or donors. Acknowledgments can also be conveyed to those who helped carry out the research.

REFERENCES

All references referred to in the article text must be listed below this section. The Reference list must contain references from primary sources (scientific journals and a minimum of 80% of the total bibliography) published in the last 10 (ten) years. Each

article contains at least 10 (ten) references. Writing a referral system in the article text and writing a bibliography should use the Mendeley reference management application program.

The heading in the References section may not be numbered. All reference items are 10pt in font size. Numbering of reference items is typed sequentially in square brackets (for example [1]) using IEEE reference style.

When you are referring to reference items in the text, please use reference numbers only, for example [2]. Don't use "Ref. [3]" or "Reference [3]", except at the beginning of a sentence, for example "Reference [3] indicates that ...". In the use of several references each number is typed in separate brackets (for example [2], [3], [4] - [6]).

The basic information in writing citation with IEEE style are as follows:

1. The list of reference must match exactly the same numerical order as in the text.
2. The first name of the author is written in the initials and the last name is written in full.
3. The first letter of the first word of an article or chapter title is written capital, while for the title of the book is written capital letter at the beginning of each word.
4. Article titles or chapter titles are quoted, while book titles, journals, and websites are italicized.

The example of reference lists is displayed as follow:
