Abstract

Start with the problem and the gap (2-3 sentences). State the study aim clearly (1 sentence). Summarize methods with maximum clarity (2-3 sentences). Present only the sharpest, most consequential results (3-4 sentences). Conclude with contribution and implications (2-3 sentences). Remember to keep your abstract under 250 words. All submitted articles must not exceed **3000 words**, excluding references and appendices.

INTRODUCTION

Introduction presents the background, reason of the research, problem, research gap, research objectives clearly stated so that the reader can understand and evaluate the results achieved from the research conducted without having to read the previous publications related to the relevant topic. Use literatures that can really support disclosure of disclosed backgrounds. Introductory chapter should contain the background and purpose of the study.

Every tables, figures, pictures, graphs, and charts must be written in line with text in pages, but if there is a need to provide a lot of information so it requires a separate pages then put in after References section as Appendix. The writing of the table title is placed above the table, with reference to the paragraph. Tables are made open, with no left and right borders.

Numbering body text is as follows:

1. Numbering 1.
2. Numbering 2.
3. Numbering 3.

METHODS

Describe completely the method used, data sources, data type, data collection method, data analysis techniques. This chapter should contain sufficient technical information so that others can experiment or analyze the same with the analytical techniques presented. If there is a variety of alternative analysis techniques that are commonly used, then briefly mention the specificity of the selected alternative techniques. Describe completely if the method used is a new analytical method.

RESULTS AND DISCUSSIONS

Result and discussion contain the answers to the research problems and conclude explicitly. For qualitative research, this discussion contains research ideas, linkage between dimensions and the position of findings on previous findings and theories.

This chapter contains the results of research both presented in the form of body writing, tables, and pictures. This section also contains a discussion of the results of the analysis, which contains an interpretation of the research results obtained and discussion associated with the results that have been reported. Avoid excessive use of graph if it can be presented in a short body writing. Number the pictures and tables in order. All images and tables presented should be placed in the body writing. Images in graphical form can be created using computer whose results are printed using either laser or quality inkjet printer.

CONCLUSION

This chapter contains the conclusions of the paper and may include policy recommendations and suggestions. Conclusion presents from the description on the discussion. Conclusion is presented in essay form, not numerical. Suggestions are arranged based on conclusions and refer to practical actions, and further research.

ACKNOWLEDGEMENTS

This brief section recognizes the support and contributions of colleagues, institutions, or organizations that assisted the authors in carrying out the study.
