TITLE HAS 14 WORDS AT MOST: Subtitle (if needed) does not contain any place name
Title contains "contraversion, changes, or the latest trend," written in Goudy Old Style 16pt

Authors' full name (international collaboration is highly recommended), written in Monotype Corsiva 12pt
Author's affiliation (write the applicable/official institution name)
E-mail: authorname@email.domain.com

Abstract

Abstract is written in English, consisting of 200 to 250 words covering background, goals, methods (specifically for field research), findings or results, and scientific contribution. Abstract is written in Goudy Old Style 12pt.

Keywords: *containing 3-5 conceptual words of the article, the words in title should also be here, written alphabetically and separated by semicolons (;)*

Introduction

Introduction consists of four or five paragraphs containing: **first**, authors describe the issues that become the background of the study, and social facts related to the issues. Authors also present evidences in relation to the issues which are the focus of the study.

Second, authors show the novelty of the study by presenting the relevant previous studies. In this part, authors do not only mention the previous author's name, but also describe the study (and the findings) briefly. Then, authors show what has been studied and what has yet to be studied in the previous works.

Third, authors explain what is/are differences between the previous literature studies and the current one.

Fourth, authors describe the argumentation or hypotheses on the issue discussed in the current study.

Authors are obliged to write in-note to complete the statements written in the article. This is to validate what is presented and to show that those written statements are based on the actual facts and research results (last name year, page) (Syarifah 2020, 15).

Research Method

This section presents briefly about the analysis unit (research object) and the methodolgy implemented by the authors (Creswell 2014, 95). It also includes the research approach, the primary and secondary data sources. The sources might be from respondents, informants, texts or manuscripts. The authors also explain how the data are collected and analyzed.

Results and Discussion

Results: Generally, this part answers the research problems mentioned in Introduction by presenting the research data. The answers are validated by the research results. They are not only written, but also presented in the forms of tables, images, graphics, or interview results, so the research content is well-comprehended by the readers (Miski 2019, 122).

Discussion: All the research results should be referred to the implemented theory and approach (Afwadzi 2019, 37). This part should describe the significance of the research results. How relevant it is to

answer the problems mentioned earlier in Introduction. If any, there should be comparison between this current research results with the previous research. Although it is not an obligatory, it is recommended to improve the article position. It will be better if the author provides if there is any relevance with other studies. Do not forget to provide in-note for every statement taken from different sources (Firdausy et al. 2019, 11).

All figures and tables should be cited in the text as Figure 1, Table 1, etc. They are made in gray. If it is in colors, it should be readable when printed in gray. Description must be in a single space. All symbols and abbreviated descriptions must be explained. Avoid using words that state the figure or table, such as "figure below" or "table as follows" because its position will be rearranged in the setting.
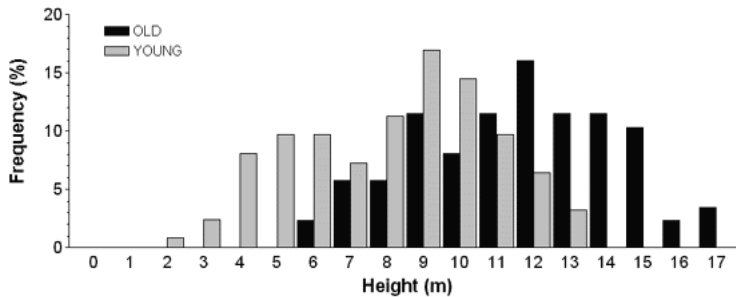

Table 1
A short description of the table written in Goudy Old Style 11pt

Title	Title	
	Title	Title
Entry 1	Data 1	Data 1
Entry 2	Data 2	Data 2
Entry 3	Data 3	Data 3
Entry 4	Data 4	Data 4
Entry 5	Data 5	Data 5

When presenting a picture as additional data for the research, please make sure that the picture is in HD quality.

Figure 1

A short description of the figure written in Goudy Old Style 11pt

If one or more verses of the Quran are quoted, do not write the Arabic version, instead, write the English translation in direct quoting (make sure that the translation is from the trusted source, NOT the amateur one), for example: *khamr* has been prohibited by Allah in Q.S. al-Maidah [5]: 90,

> *"O you who have believed, indeed, intoxicants, gambling, [sacrificing on] stone alters [to other than Allah], and divining arrows are but defilement from the work of Satan, so avoid it that you may be successful."*

For hadith, the in-note is (al-Sijistânî n.d., vol. 4, no. 507, 76). You need to write the hadith's translation in English,

> *"Make sure the translation is from the trusted source, not the amateur one."*

However, there is a slightly difference in the format for quoting the interview transcript (if authors used interview when collecting research data),

> *"This is the example of how authors should write a direct quotation if their research involved interview in collecting the data"* (Afwadzi 2018).

If the articles mentioned some Arabic (or other languages) terms, please provide the English terms, for example: *riba* (usury). The transliteration from Arabic to Latin uses the following styles:

Arabic	Latin	Arabic	Latin
أ	a	ض	ḍ
ب	b	ط	t̩
ت	t	ظ	z̧
ث	th	ع	'
ج	j	غ	gh
ح	ḥ	ف	f
خ	kh	ق	q
د	d	ك	k
ذ	dh	ل	l
ر	r	م	m
ز	z	ن	n
س	s	و	w
ش	sh	ه	h
ص	ṣ	ي	y

Long vocal   : â î û
Diphthong   : aw ay
Ta' marbûtâh : t or h
Article   : al-

Conclusion

We encourage authors to write the essential findings of the research, as well as its scientific contribution to the field of science. Authors are expected to present their study limitation, so it can be the reference for the next research. Conclusion should be concise and clear that it does not lead to further questions. It covers the answers to problems presented in the beginning of the article, whether the issues

are solved in this study or not. It has statements that strengthen the research findings.

Acknowledgement

This section is not obligatory. You may add this if you want to thank certain institution and/or organization granting you funds for doing research or publishing article.

References

References should be written according to the *American Political Science Association* (APSA) Style. The References contains only from the taken sources. **Make sure that all references mentioned in the in-note (from the article body) are listed in References**. They must be 15 references at least, in which 80% are from the scientific journal (Scopus-indexed ones are recommended) published in the last 5 years. We suggest authors to use reference managers such as Mendeley and Zotero to avoid typing mistakes and duplicated references.

Example:

Journal article written by one or two authors (with DOI)

Syarifah, Umaiyatus. 2014. Kontribusi Muhammad Musthafa Azami dalam pemikiran hadits (counter atas kritik orientalis). *Ulul Albab: Jurnal Studi Islam*, 15(2): 222-241.
DOI: https://doi.org/10.18860/ua.v15i2.2728.

Journal article written by more than two authors (with DOI)

Rosmanidar, Elyanti. et al. 2022. Is it fair to assess the performance of Islamic banks based on the conventional bank platform?. *Ulul Albab: Jurnal Studi Islam*, 23(1): 1-27.
DOI: https://doi.org/10.18860/ua.v23i1.15473.
