

Good news! We're on Epic Games now. Follow the steps below to get started.

View our store page:

<https://store.epicgames.com/en-US/p/stumble-upon-rumble-52275d>

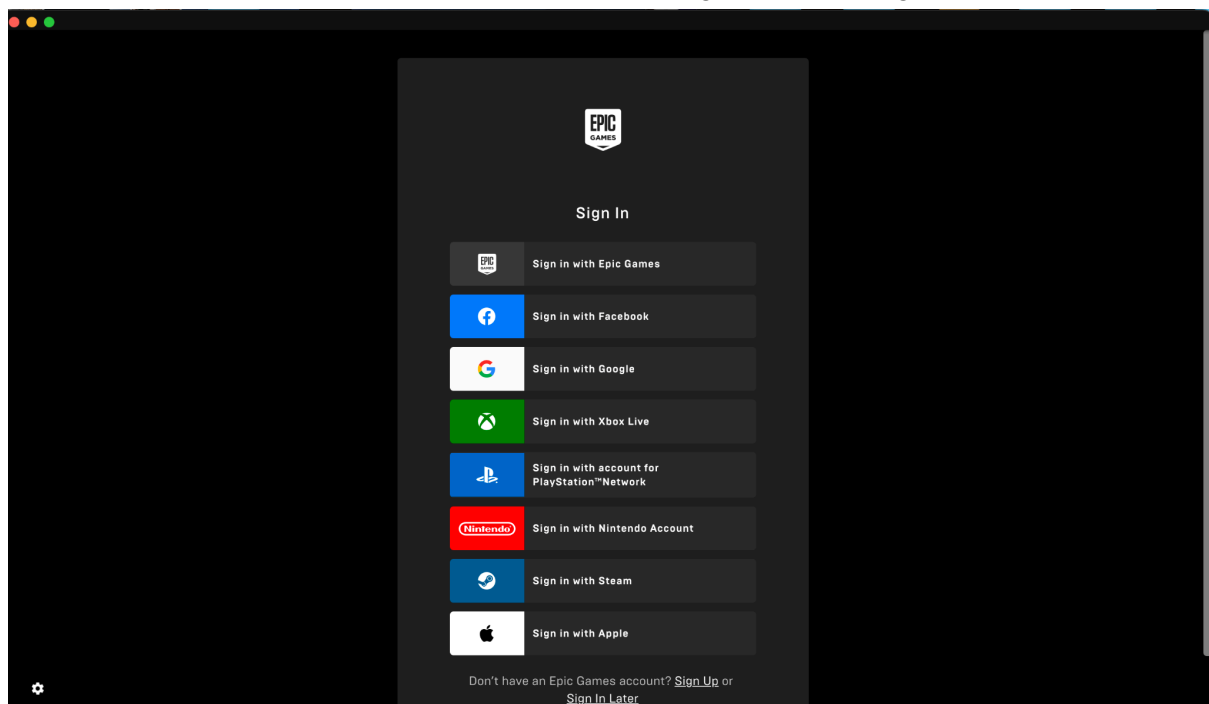

Press wishlist on the right side

1. Get the Epic Games Launcher

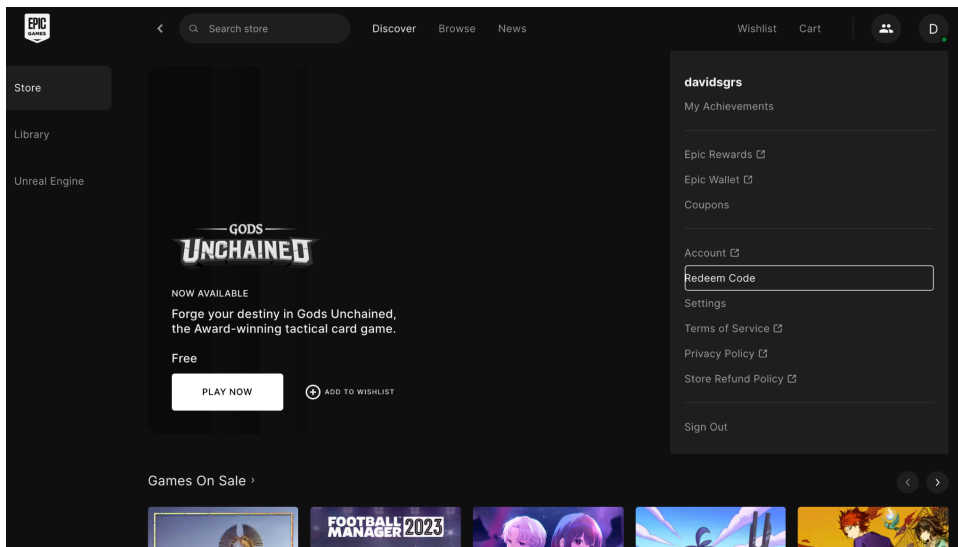

Go to <https://store.epicgames.com/en-US/> and press download in the top right corner. Follow the steps to install it.

Now create an account or use one of the other existing avenues to sign in.

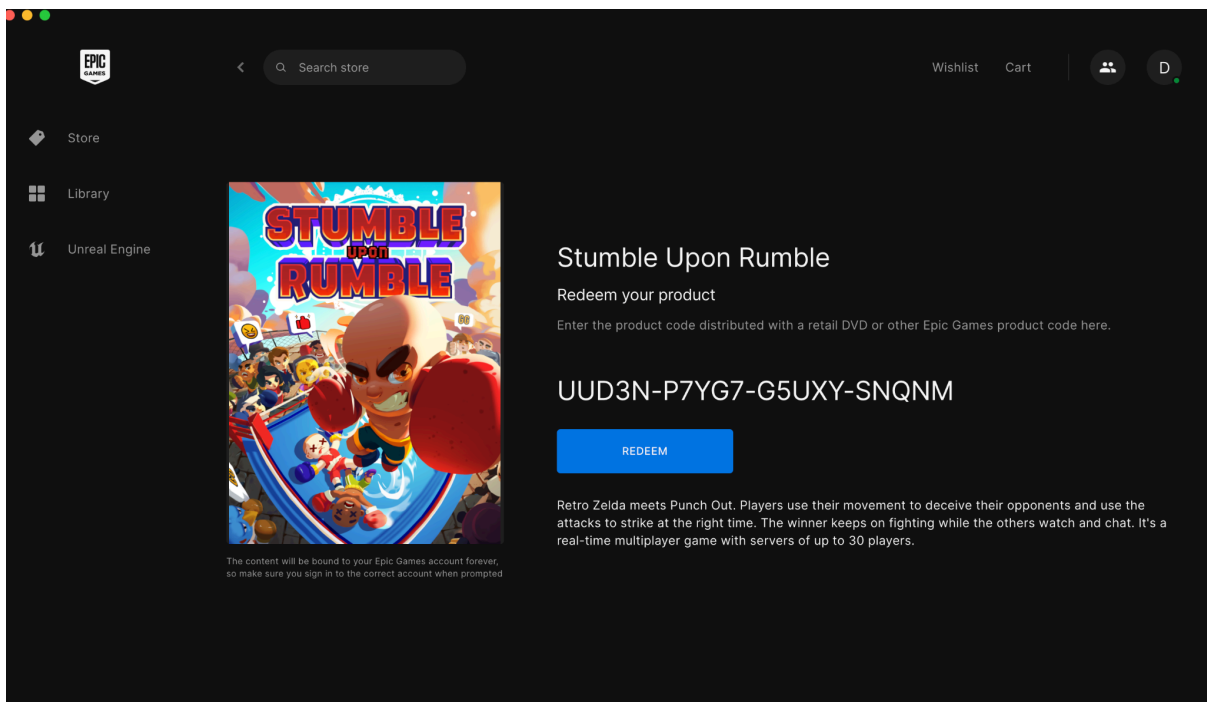

2. Getting the game

On the Epic Launcher, go to the top right icon that represents your profile. In the drop down menu, select the 'redeem code' option.

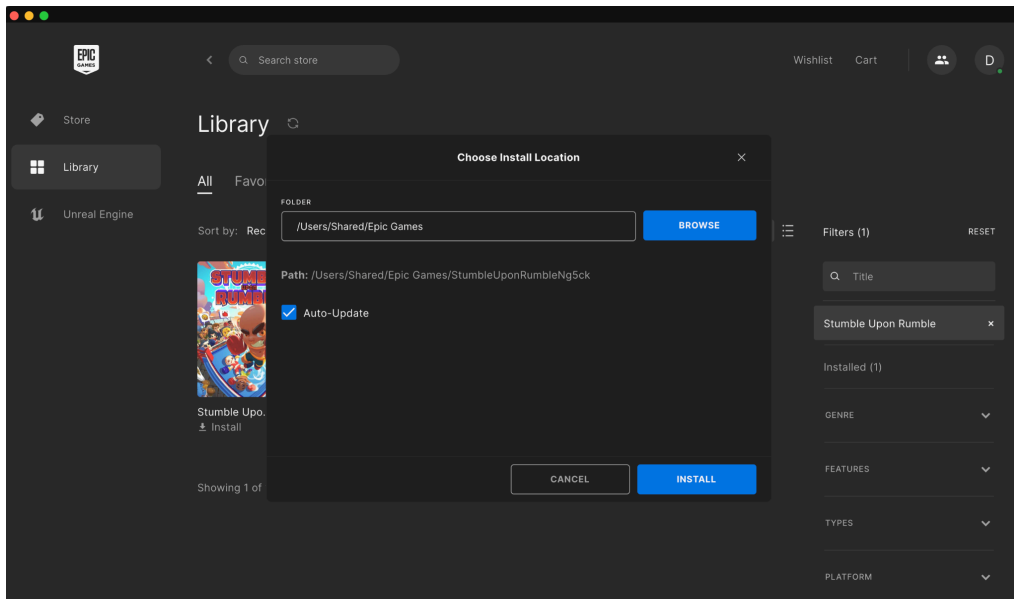

You can now enter the code that we have given to you. If you do not have a code yet, please contact us or open a ticket in our Discord. CODES ARE SINGLE USE ONLY.

You will see the game appear if everything was done correctly.

Now go to the library on the left side, click the game, and press install.

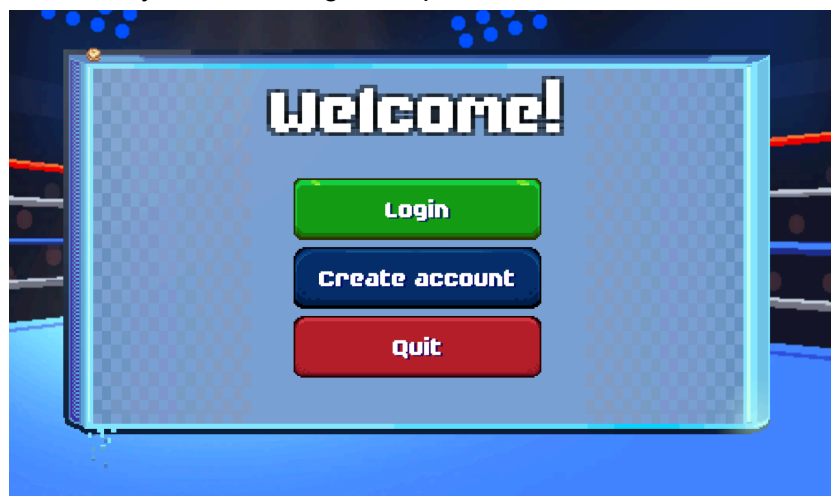

3. Open the game

After you've installed the game, you can now open it any time from your Epic Games Library! Simply press the game and it will start.

4. Getting Started

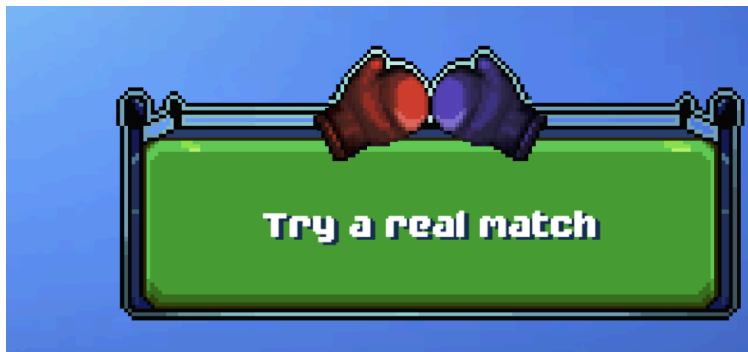

First you need to create an account with an email address and a password, then you can login with the same credentials. Note that this is a new Stumble upon Rumble account, and it is not the same account you used to log into Epic Games.

You will then be put in the tutorial so you understand the game mechanics. Just listen to Big Jim and you'll get the hang of it quickly!

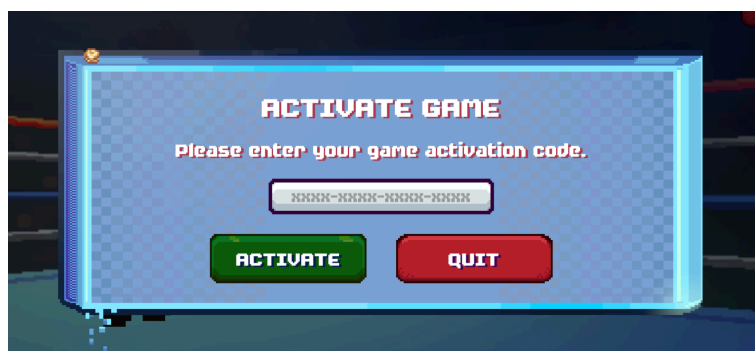

After completing the tutorial and choosing a name, press try a real match in the bottom right corner. You'll now experience a real fight against one of our AI opponents.

IMPORTANT!

You will now be asked for an activation code. We do this to prevent the game being spread outside of our partnered communities.

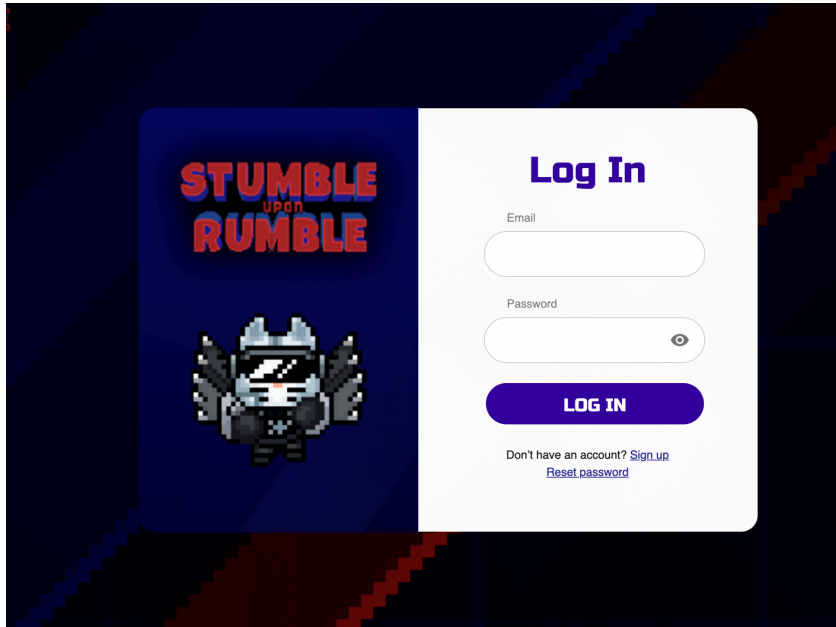

As a Glove NFT holder, you do not need a code though. Follow the steps below to get in the game. If you do not have a Glove NFT, please contact the team or open a support ticket in the Discord.

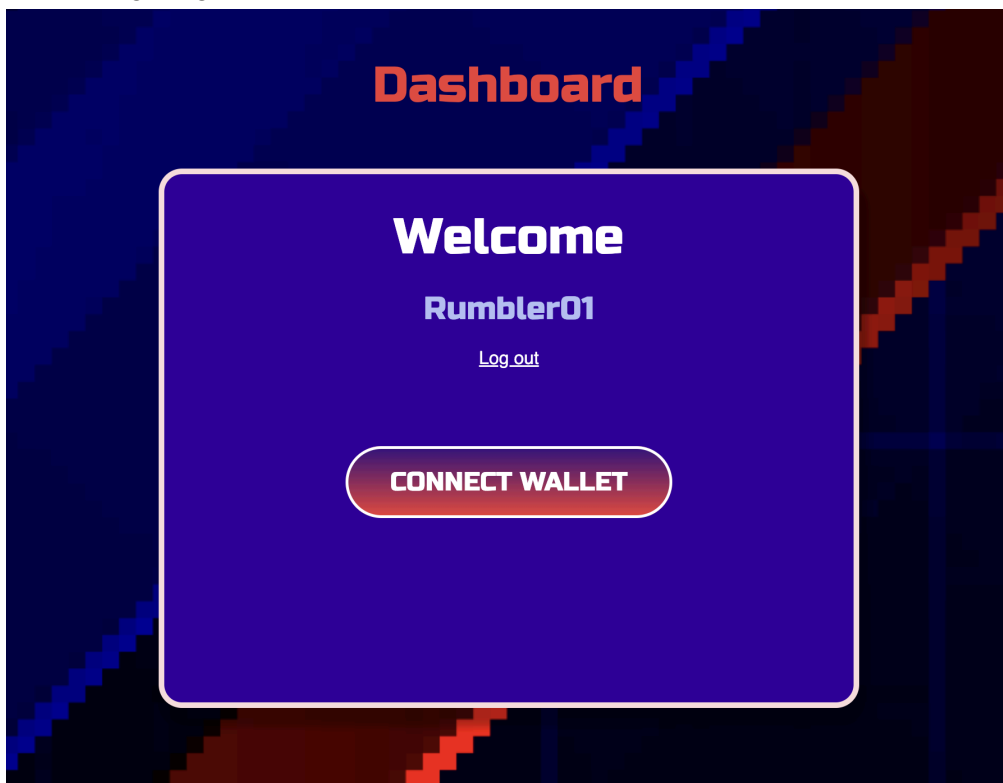

5. Connecting your wallet.

First, go to <https://account.stumbleuponrumble.com/> with the browser that has your Glove NFT wallet connected to it.
Press the login button

Here you can log in with your in-game account, the one you just made in step 3.

Now press the connect wallet button and connect your Glove NFT holding wallet. You will need to sign a gasless transaction to confirm ownership of the wallet.

You wallet should now say connected on the UI. If it doesn't connect, do a hard refresh of the web page and try again.

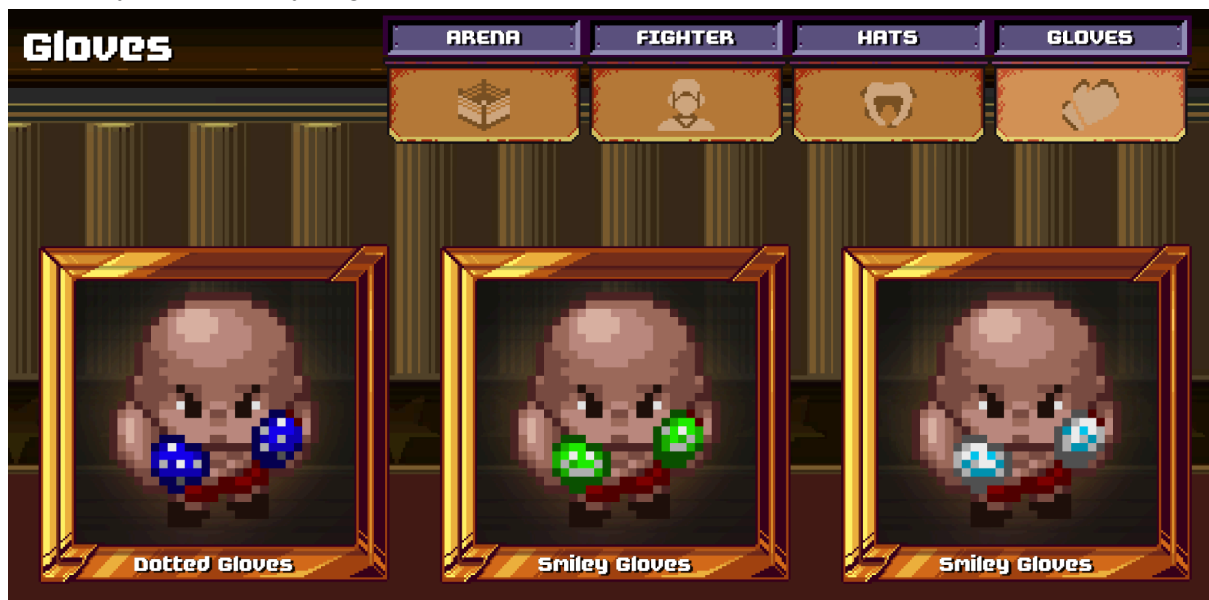

You can now go back to the game. You may need to restart it. After that you'll be good to go!

6. Wear the cosmetics or gloves

To wear your character's gloves, go to the customize button in the bottom left in the screen.

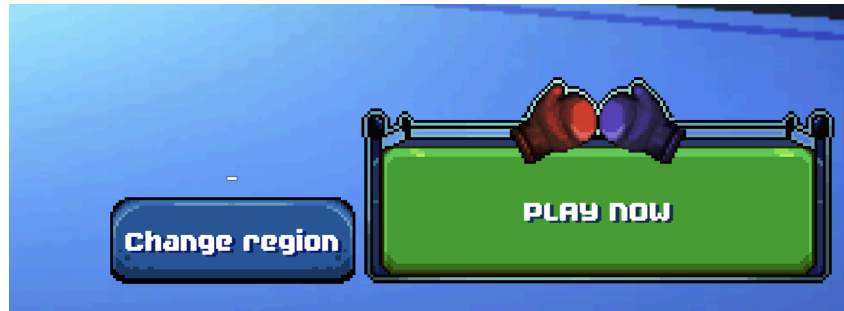

Press the top right gloves tab, and all your gloves will be shown. Tap the gloves you want to use and you'll be ready to go.

Note that your wins only count for the pair of gloves you are wearing. If you have multiple gloves, you can always go back to this menu and select a new pair of gloves to start getting wins for that one.

7. Get to Rumbling

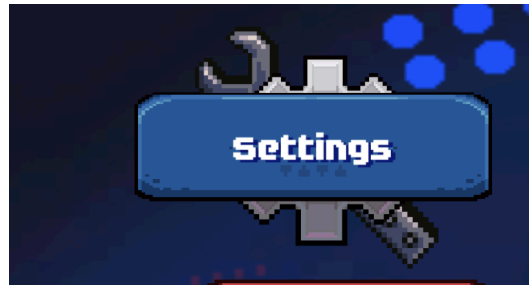

Now on the bottom right of the screen you can start playing. If you want to select your region, press the change region button. If you don't, we auto select your best region. Then press play now to join a server.

Now you're free to roam around in the server. The same controls apply as in the tutorial, or if you changed your key binds in the settings you can now use those. Some important buttons:

- **Fight now on the left of the screen.**
Press this button to join the fighting queue. You can see how many players are waiting in front of you. To unqueue, simply press it again.
- **Chatting: the ENTER button**
Press enter to start typing a message, then press enter again to send it.
- **Playerlist: the TAB button**
To see all the players in the server press and hold the tab button.
- **Menu: the ESC button**
Pressing ESC will show you the menu. Here you can see the chat log in case you missed a message and you can go back to the main menu.
- **Zooming: + and - buttons**
You can change the camera zoom of your screen by holding the + and - buttons. It's great to improve your spectating experience.

You can customize your controls by going to the settings in the top right of the screen. Here you can change the audio settings as well as create custom keybinds for your controls.

Controls

Back	Kick	S	Change	Reset
	Punch	A	Change	Reset
