Shark Tank - Web Development
Lesson 07 - CSS Layouts
Practice

1. Setup:
    a. Download, Unzip and file bloomsAndBulbs07.zip
2. Create a page using CSS Layout
    a. Create a new page with the "HTML 5 2 column fixed right sidebar, header and footer" style
    b. Save the HTML5_twoColFixRtHdr.css file in the styles folders
    c. Add the blooms.css style to the page
    d. Save the page as workshops.html, overwriting the existing workshops.html page.
3. Adding Content
    a. Open index.html and copy the banner image and navigation bar
    b. Close index.html and replace the workshops header placeholders with the banner and navigation bar
    c. Replace the footer placeholder text with **Copyright 2001-2016 Blooms & Bulbs**.
    d. Replace the content block place holder text and replace with the text **New Composting Workshop!**. as a level 1 header.
    e. Add a paragraph break and import, clean and spell check the composting.doc content.
    f. Enter a paragraph break and insert the chives.jpg image with the alt text as **Even chives can be beautiful**.
    g. Save and preview in browser.
4. Editing and Formatting CSS
    a. Set the Block category Text align property to center in the footer rule. In addition, set the background color to #AFA19E
    b. Select the header rule and change the background color to #FFF. And change the box properties so that there is a 5px margin on all sides.
    c. Set the background color of the sidebar1 rule to #FFF. Also, set the box category float property to left.
    d. Change the body rule so that font size if 14 pixels.
    e. Indent the chives image.
    f. Save and preview in browser.
