Teacher must calculate the Total Score Achieved over the Total Points Possible:

Teacher can choose sum and add a / instead of : =SUM(G2/H2)

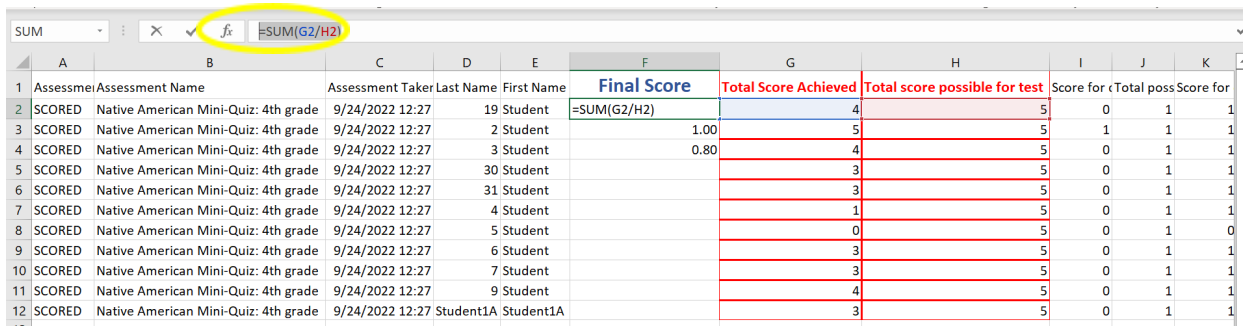

ClassFlow How-to Guide:

- 1) Viewing Score Charts/ Individual questions
- 2) Downloading and Calculating Final Grades for ClassFlow Assessments and Assignments

Teacher can choose sum or type the following into the formula bar =SUM(G2/H2) -or- =G2/H2

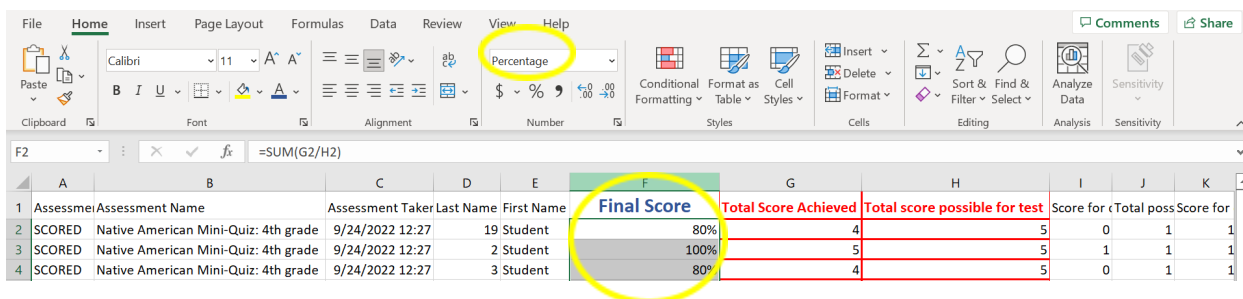

**** =SUM (G2:H2) will add the two numbers so you must use the / instead**

The screenshot shows the Excel interface with the formula bar containing `=SUM(G2/H2)`. The table below displays assessment data with columns for Assessment Name, Assessment Taker, Last Name, First Name, Final Score, Total Score Achieved, Total score possible for test, and Score for (Total poss Score for.
