

Privacy Policy

Effective date: October 3, 2026

App: Snakes & Ladders

Developer: Xvinz Digital Services

This Privacy Policy explains how Snakes & Ladders handles information when you use the app.

Information We Collect

Snakes & Ladders is designed to work without requiring an account or personal information.

The app does not intentionally collect, store, or transmit:

- Names, email addresses, or phone numbers
- Precise location
- Contacts, photos, or files
- Payment information
- User-generated content

Game settings and progress may be stored locally on your device. This information is not transmitted to the developer.

Permissions

The app does not request access to sensitive device permissions unless a feature clearly requires it. Any permission requested by the app will be used only to provide the associated feature.

Advertising and Analytics

Choose the statement that matches the released app:

If the app has no ads or analytics:

The app does not contain advertising and does not use third-party analytics or tracking services.

If the app uses ads or analytics:

The app may use third-party services for advertising, analytics, crash reporting, or app-performance measurement. These providers may automatically receive information such as the device type, operating-system version, advertising identifier, approximate location derived from an IP address, app interactions, and crash diagnostics. Their handling of information is governed by their respective privacy policies.

List and link every service used, such as Google AdMob, Firebase Analytics, Firebase Crashlytics, or another SDK.

Children's Privacy

Snakes & Ladders may be used by children. The developer does not knowingly request or collect personal information from children.

If advertising or analytics services are included, they will be configured, where applicable, to comply with children's privacy requirements and to avoid personalized advertising for users identified as children.

A parent or guardian who believes that a child has provided personal information may contact us to request its deletion.

Data Sharing and Sale

The developer does not sell or rent personal information.

Information is shared only when necessary to operate an enabled third-party service, comply with applicable law, protect users, or defend legal rights.

Data Security

Reasonable safeguards are used to protect information handled by the app. However, no electronic storage or transmission method can be guaranteed to be completely secure.

Data Retention and Deletion

Locally stored game data remains on the device until the user clears the app's data or uninstalls the app.

If the app later introduces accounts or cloud storage, this policy will be updated with instructions for requesting access to or deletion of associated information.

External Links

The app may contain links to third-party websites or services. The developer is not responsible for the content or privacy practices of those third parties.

Changes to This Policy

This Privacy Policy may be updated when the app's features or legal obligations change. The revised policy will be published with a new effective date.

Contact Us

Questions or privacy requests can be sent to:
