

Introducing X7game function

1、How to download for iOS

- (1) Open the download link in Safari browser;
- (2) Click to install now;
- (3) Click Share to add the website to your mobile phone's home screen;
- (4) Open the store on the main interface.
- (5) Click to confirm

After setup is complete, you will see the X7game store icon on the home screen.

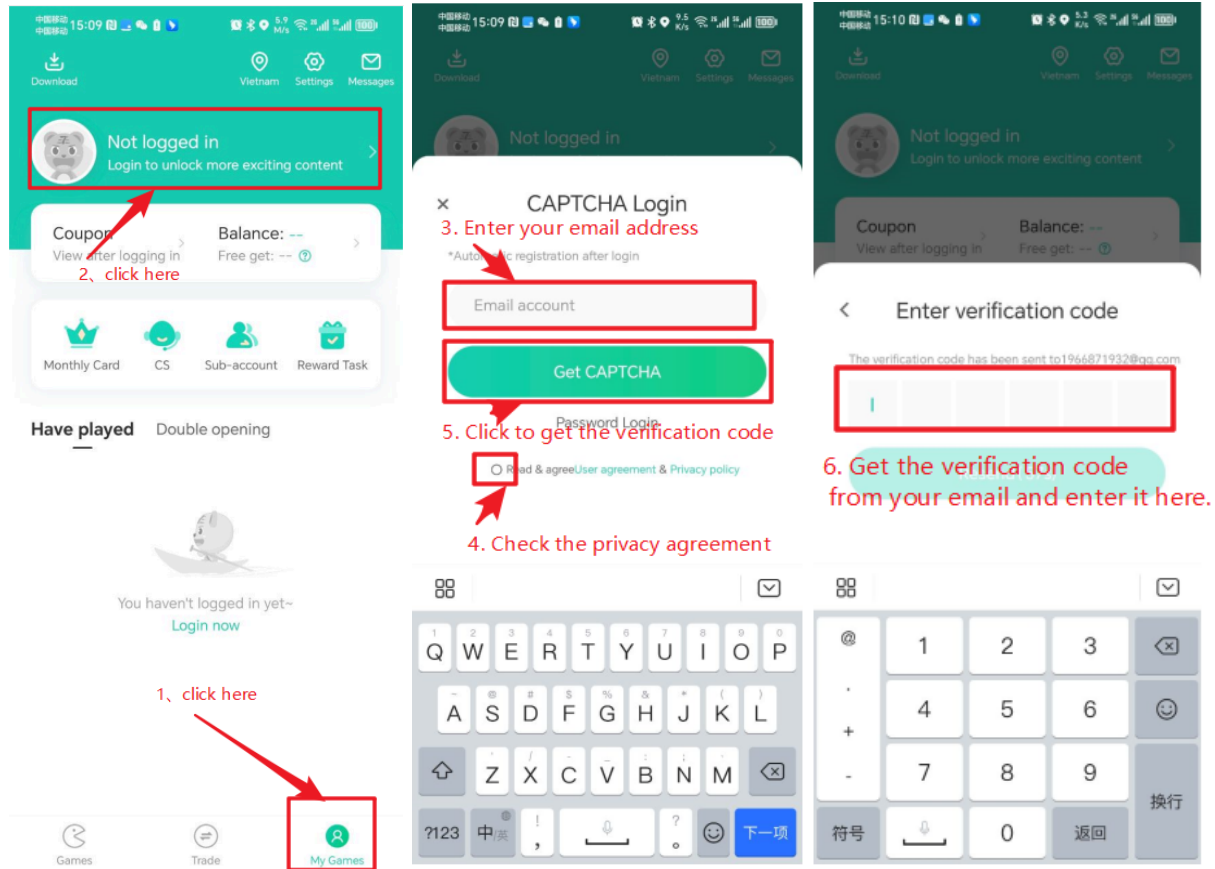

2. Register an account

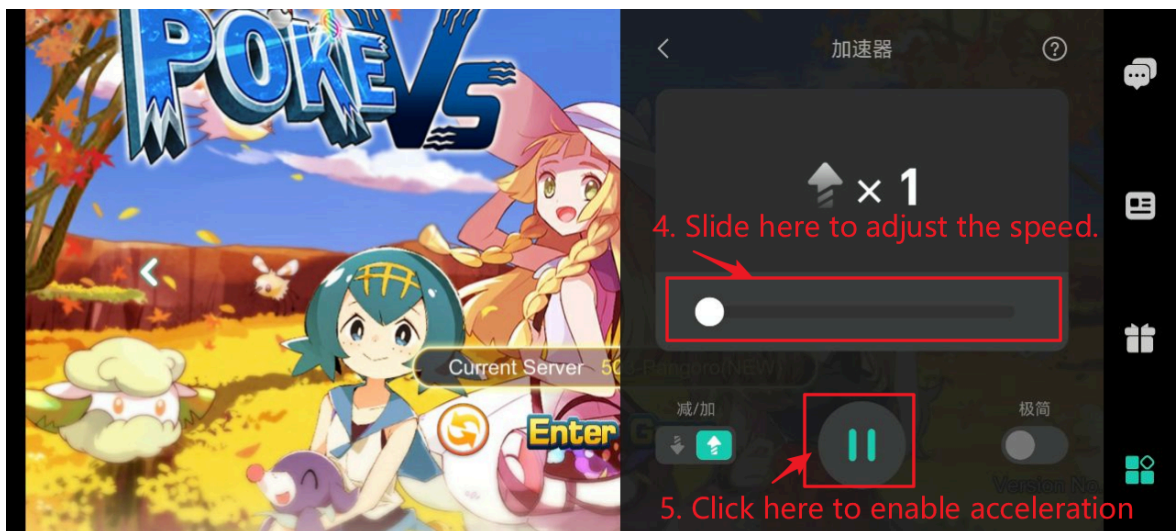

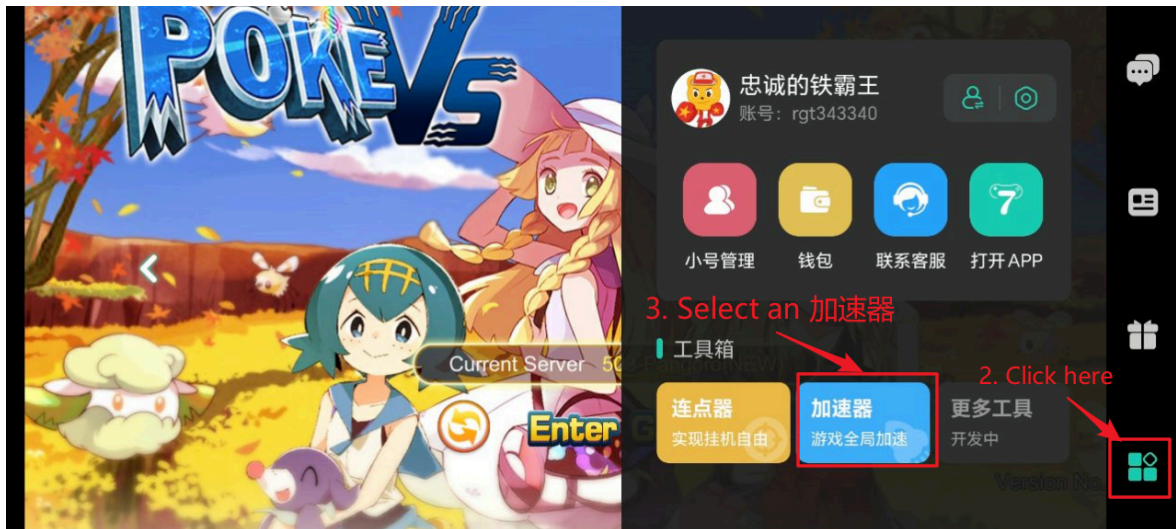

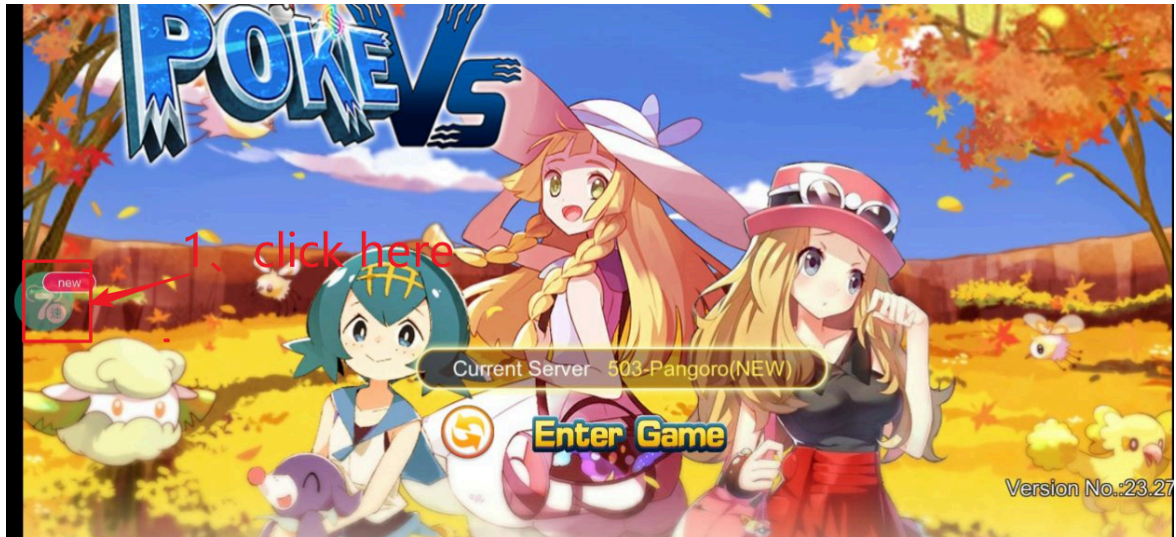

We use email for registration and the verification code required for registration will be sent to the email.

Registration steps are as shown in the picture:

3. Game acceleration function

Our game has an acceleration function, when the acceleration function is enabled, the battle speed of the game can be accelerated. There is a "速" mark on the floating window, indicating that the acceleration function can be used, otherwise the acceleration function cannot be used. Using the acceleration function may cause the novice guide to be unable to complete the task. If the novice's task cannot be completed, please turn off the acceleration function.

4、Translation function

Our product has a translation function, which can be enabled as follows:

1. Click the floating ball;
2. Select the translation function
3. Select the translation language and translation method
