

FRYSC Network

GRREC's Family Resource Youth Services Center (FRYSC) Network aims to foster a vibrant, collaborative experience that empowers FRYSC coordinators and partners with professional learning, shared resources, and colleague connection—ultimately enhancing the well-being and success of students and families. Through meaningful dialogue and collective problem-solving, we are committed to building a supportive network rooted in innovation, equity, and continuous improvement. While the format of network sessions may vary, our shared goal remains the same: to create collaborative spaces that strengthen systems of support for children, youth, and their communities.
